1. Document buttons

1.1. Header buttons

- **New** - opens a new blank document
- **Save** - saves the document
- **Copy** - makes a copy of the document. Only one unsaved draft can be opened at a time. Next copy can be made, when new document is saved.
- **Discard** - The button is active when the transaction is in draft status or unsaved changes have been made to the entry. After selecting Discard, the unsaved changes will be removed and the transaction will be saved.
- **Delete** - deletes the transaction. Asks in advance if you are sure you want to delete. Only these fixed assets documents can be deleted which have no operations performed (calculated depreciation, follow-up documents created etc).
- **Attachments** - allows to associate files with a document
- **Mail** - allows to send a document by e-mail
- **Print** - prints the document
- **Write off** - allows assets to be written off
- **Change FA** - allows to make changes to the fixed asset
- **Recalculate** - allows to add asset recalculations
- **Depreciate** - makes depreciation transactions
-  - allows to display various location additional information fields on the fixed assets card
 - Option Select the additional location information fields

- Display the required fields

Choose columns

Set: Personal Save and use Save as new set

Active columns

To change the order of columns drag it to the desired location.

1.2. Row buttons

- **Calculate amortization %** - calculates the depreciation percentage when start and end dates of the calculation are filled
- **Calculate end of amortization** - displays the date in the End date field

2. Document fields

2.1. Header fields

- **Code:** unique ID that can be entered manually or selected from double-click / right-click options
- **Name:** name of fixed asset
- **Class:** asset class code - places the financial accounts, depreciation % and type related to the asset class, groups them in the fixed asset reports. Selectable by double-clicking / right-clicking. Only classes with a fixed asset type can be saved.
- **Class name:** asset class name
- **Leasing:** options NO, Capital lease, Operating lease - information field for the acquisition of a fixed asset
- **Rental asset:** checkmark. Allows to select this fixed asset for lease contract. Opens the Rental Info section on the Asset card.
- **Fair value:** checkmark. Indicate if the fixed assets are recorded at fair value.
- **Master:** if the fixed asset is a part of another fixed asset, reports can be taken with the master asset.
- **Comment:** specifying field of the fixed asset name
- **Type:** tangible asset/intangible asset
- **Calculation method:** straight line, diminishing balance, units of production

- **Auto:** allows to select this asset for the calculation of the vehicle's fringe benefit. Opens Vehicle's fringe benefit taxation data on asset card.
- **Bar code:** asset bar code

2.2. Data

2.2.1. Fiscal data

- **Start date:** date from which the depreciation is calculated. Usually fixed asset purchase date. Related to the date of purchase. The start of the calculation can be in the same month in the past compared to the date of purchase. Future can be used.
- **Purchase price:** fixed asset original purchase price (the purchase price may also be negative)
- **Value corrections:** total cost of fixed assets additional amounts
- **Amort:** depreciation % per annum
- **Depreciation:** not required for new fixed assets. After the depreciation transaction has been made, depreciated amount is entered here automatically. To be filled in entering opening balances, changing the system settings if necessary „Asset date for opening balances“.
- **End date:** blank by default. The date of write-off shall be the date of write-off. Fill in if relevant and the depreciation calculation will be completed by a specific date. Pressing the „Calculate Amortization %“ button will calculate the depreciation % so that the fixed asset will be depreciated by the date entered, if it is filled in.
- **Current value:** fills in automatically (purchase price - depreciation)
- **Remaining value:** the residual value of the fixed assets to which the fixed assets are depreciated
- **Uncounted:** if the asset has future amortization lines (not transactions), the sum of these rows is displayed here
- **Month depreciation:** informative field, one month's depreciation expense
- **E end of depr.:** informatiivne väli, arvutab arvestuse alguse aja ja amordi % järgi amortisatsiooni arvestamise lõpu aja lineaarse amortisatsioonimeetodi järgi. Ei ole aluseks amortisatsioonikannete tegemisel.
- **Purchase price total:** adds up the purchase price and value corrections
- **Last depr. date:** date of the last depreciation calculation
- **Last depr. no:** the number of the last depreciation transaction as a link
- **Inventory:** date of inventory
- **Calculate end of amortization:** calculates the end date of depreciation

2.2.2. Accounts

If asset classes are filled in, accounts are placed from classes.

- **Asset type:** an asset account with the acquisition cost of fixed assets
- **Depreciation:** asset account, for example, “Depreciation of accumulated fixed assets”
- **Amort:** expense account, for example, “Depreciation of fixed assets”
- **Write off:** expense account used for the write-off
- **Sales profit:** income account, in which both sales revenue and written-off residual value are entered in the sale of fixed assets, if the selling price is higher than the residual value
- **Sales loss:** income account, in which both sales revenue and written-off residual value are entered in the sale of fixed assets, if the selling price is lower than the residual value

Make sure that the start date of the calculation is not earlier than the date of purchase. If it is necessary to start accounting earlier, write the date of purchase earlier on the property card.

2.2.3. Purchase data

- **Supplier:** supplier code on purchase invoice
- **Supplier name:** supplier name on purchase invoice
- **Purchase invoice:** the purchase invoice number from which the fixed asset card was created. The link opens the purchase invoice.
- **Purchased:** purchase invoice date
- **SN:** serial number - information field
- **Disposed:** date
- **Warranty:** date
- **Extended warranty:** date
- **Quantity:** if fixed asset is created from purchase invoice the quantity information is taken from the purchase invoice. Fixed asset quantity is 1.
- **Item:** item code
- **Maintenance provider:** maintenance provider code
- **Maintenance provider name:** name of the maintenance provider
- **In maintenance:** checkmark
- **Maintenance:** date (last maintenance / repair)
- **Next maintenance:** date (next scheduled maintenance / repair)
- **Action:** selection of different activities- purchase, received free of charge, improvements, construction in progress in, property, unfinished developments, off-balance sheet asset in

2.2.4. Location

- **Department:** option of department tab
- **User:** option of the user tab, the code is placed
- **In charge:** option of the user tab, the code is placed
- **Object:** object or list of objects with commas
- **Customer code:** option of the customer tab, the code is placed
- **Customer Name:** name of the selected customer
- **Project:** option of the project tab
- **Location:** address ID. If a department is selected, only the location codes (address ID) marked on that department can be placed. If no department is marked, all location (address ID) codes can be selected.

2.2.5. Insurance data

- **Insurance list:** checkmark, selecting will create an insurance list
- **Insurance cover:** the amount in which the low value asset is insured
- **Insurer:** insurance supplier code
- **Insurer name:** insurance supplier name
- **Comment:** text field

2.2.6. Rental info

- **Rental item:** an article that is placed on a fixed asset contract as a line item or the article under which the fixed asset is leased. The field is filled by default when you place an article on a fixed asset on rental item field in item card. On asset card this field can be replaced.
- **Rental unit:** options - month, day, without sunday, workday
- **Rental start:** determines the date when fixed asset is offered for rent. It can also be empty or only one of them can be empty.
- **Rental end:** determines the date fixed asset lease expires

2.2.7. Vehicle fringe benefit data

- **Registered:** note on the car registration card
- **kW:** car engine power kW
- **50/100:** usage options no, 50, 100 according to Estonian tax law
- **Valid from:** beginning of the period from which the fringe benefit tax is calculated for the car
- **Vehicles reg. number:** car registration number
- **Owner:** options No, Employer or Personal
- * **Valid until:** the end of the period from which the calculation of car fringe benefit tax is terminated
- **ES TM:** checkmark, makes a fringe benefit income tax transaction
- **ES SOTS:** checkmark, makes a fringe benefit social tax transaction
- **ES kW:** checkmark, calculates the sum on which the car fringe benefit is based on
- **KMD 50:** checkmark, determines the number of cars in the 50% use in VAT declaration
- **KMD 100:** checkmark, determines the number of cars in the 100% use in VAT declaration
- **Transaction time :** indicates the fringe benefit tax calculation last date
- **Transaction number :** indicates the transaction number (transaction link opens in the Activities tab)

Fiscal data - The start of the calculation cannot be later than the start date of the car's fringe benefit tax.

2.3. Data fields

Data fields can be used to add parameters that are not described on the Low Value Asset card and later use in reports. Data fields to be described [Lisaväljad](#). **LINK TULEB ÄRA MUUTA**

- **Type:** selection of additional fields described on the fixed asset card
- **Content:** the contents of the data field selected in the selection line or added manually
- **Parameter:** text field

2.4. Value corrections

- **Date:** date - start of calculation
- **Value correction:** adding an amount
- **Object:** object or list of objects with commas
- **User:** option of the users tab, code is placed

- **Comment:** text field
- **Supplier:** option of the suppliers tab, code is placed
- **Supplier name:** selected supplier name
- **Document:** selection of the list (purchase invoice, expense, written off data, recalculation)
- **Number:** document number
- **Purchased:** date
- **Action:** selection of different activities- purchase, received free of charge, improvements, construction in progress in, property, unfinished developments, off-balance sheet assets in

2.5. Units of production method

- **Date:** date
- **Usage:** text field

2.6. Users

- **Type:** fixed asset type in the Personnel module. Selection from the drop-down menu. Settings: [Inventari ja personali vahendite seos](#) **LINK TULEB ÄRA MUUTA**
- **User:** selection from users tab, the code is placed
- **User name:** user name is displayed (after saving), cannot be changed
- **Contract:** the document on the basis of which the fixed asset was issued to the user. Text field. Not required
- **Close out:** selection from users tab, the code is placed
- **Close out name:** name is displayed (after saving), cannot be changed
- **Start date:** date of issue the fixed asset to the user
- **End date:** asset return date or termination of liability
- **Comment:** explanatory text. Not required

2.7. Proportions

Allows one month's amortization transaction to be shared between multiple cost items or projects.

- **Proportion:** number field
- **Cost object:** object or list of objects with commas
- **Cost project:** option of the project tab, the code is placed
- **Start date:** validity start date
- **End date:** validity start date

2.8. Actions

Shows the activities performed with fixed assets (amortization, recalculation, etc.).

- **Date:** date
- **Action date:** date
- **Transaction time:** date
- **Action:** action type is displayed
- **Who:** user name is displayed

- **When:** action date
- **Depreciation:** cost sum (eg monthly cost of depreciation expense)
- **Value:** value sum (eg fixed asset purchase price cost)
- **Transaction:** transaction number
- **Document:** related document number

3. Creating a new fixed asset card

New fixed asset card can be created as follows:

- From the purchase document
- From the expense document
- From the stock depreciation document
- From fixed assets register
- By bulk importing fixed assets cards

3.1. Creating a fixed asset card from the purchase invoice document

Enter the purchase invoice, select an asset account in the Account field, to which the acquisition cost of fixed assets must go.

																			<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>										
No	Type	Account	Object	Project	User	Description	Total	VAT code	VAT	start	end	WIP	Corr.object	Corr.project	S.Receipt	Vendors invoice	Subtotal	Resource	Expense	Asset												
1		125361	ADMIN		JOHN	Computer Lenovo	10000.00	0	0.00			<input type="checkbox"/>																				
2												<input type="checkbox"/>																				

After confirming the purchase invoice, a New FA button will appear below the third dot at the top of the lines. By pressing the button, a new fixed asset card opens with pre-filled information that can be queried from the purchase invoice and which remains directly related to that purchase invoice. Data is added automatically if you select an account in the purchase invoice that matches the account for the asset class.

Accounts: accounts are placed from asset class.

If at least one account is not specified on an asset card (tangible asset or intangible asset), the program will not allow any depreciation transaction to be made. Also applies to future asset cards.

If the quantity is bigger than 1 in the purchase invoice line, quantity of 1 is saved on the fixed asset card, because only 1 fixed asset can be on one card.

Maintenance, location and insurance data are for information purposes only and can be used as needed.

3.2. Creating a fixed assets card from the expense document

After confirming the expense, a New FA button will appear below the third dot at the top of the lines. By pressing the button, a new fixed asset card opens with pre-filled information that can be queried from the expense and which remains directly related to that expense. Data is added automatically if

you select an account to the expense which matches the account for the asset class.

NEW FA NEW LVA ADD FA ADD LVA

3.3 Creating a fixed asset card from the stock depreciation document

After confirming the stock depreciation, a New FA button will appear in the end of the rows. By pressing the button, a new fixed asset card opens with pre-filled information that can be queried from the stock depreciation and which remains directly related to that stock depreciation.

3.4. Creating a fixed asset card from register

The Fixed Assets card can be created from the Fixed Assets register or from the Fixed Assets card.

Finance > Fixed assets > Add new

There is no pre-filled data on the manually created fixed assets card.

3.5. Creating a fixed asset card from bulk import module

For large data amounts, it is convenient to use the bulk import module. Provides the ability to import a pre-formatted Excel spreadsheet with fixed asset card information into Directo and as a result, a corresponding number of fixed asset cards are created in Directo. Large data updates are also possible through the same module.

Importing large data amounts, it is important to know that the type of asset must be given as a number in the prepared data table:

0 - low value asset 1 - tangible asset 2 - intangible asset 3 - written-off asset

3.6. Entering a depreciated fixed asset card

Use only when entering open balances. It can also be used when buying/adding a new company or department and it is necessary to add additional fixed assets with opening balances in the already operating Directo base.

Follow exactly the steps when entering open balances.

3.6.1. Enter the Asset Date for opening balances

If the **previous depreciation amount** is already known, when the fixed asset card is inserted, the depreciation date must be added to the system settings before it is inserted. Corresponding setting can be found Settings > System settings > Asset settings > Asset date for entering balances.

For example, asset date for **entering balances** is **31.12.2021**. In this case, insert the date in the system settings.

Asset date for entering balances	31.12.2021	?
----------------------------------	------------	---

3.6.2. Fill in the asset card fields

Fill in the start time, purchase price and depreciation on the fixed asset card.

Save the card and then add the depreciation sum, otherwise the depreciation will disappear, when saving the card for the first time.

FISCAL DATA							
Start date	Purchase price	Value correction	Amort %	Depreciation	End date	Current value	Remaining value
01.07.2021	1000		33.3333	125	31.12.2023	875.0000	
Uncounted	Month depreciation	E end of depr.	Purchase price total	Last depr. date	Last depr. no	Inventory	
	0.00	30.06.2024	1000				
Calculate amortization %		Calculate end of amortization					

3.6.3. Delete the field Asset date for entering balances

When the fixed asset tabs are filled in, return to the system settings and delete the previously marked date.

3.6.4. Maintenance

The last step is maintenance. Finance > Reports > Maintenance open maintenance and add dot to Robots box:

<input type="radio"/> Check <input type="radio"/> Maintenance <input type="radio"/> Import/Export <input type="radio"/> Document opener <input type="radio"/> User files <input checked="" type="radio"/> Robots <input type="radio"/> Digital cleanup					
Description	One time Executions		Executed Run by Auto run time		
Tee hankijale ettemaksudest EURi omad	<input type="checkbox"/>	0			Execute
Tee klientide ettemaksudest EURi omad	<input type="checkbox"/>	0			Execute
Korrasta inventari ajalugu	<input type="checkbox"/>	7	25.01.2022 10:56:12	JANE	Execute

If no date is entered, depreciation is saved with the current date and depreciation transactions can no longer be made in earlier periods.

If the system setting Asset date for entering balances is filled:

- the depreciation box on the asset card is editable
- depreciation cannot be calculated
- do not change the asset browser

4. Asset card confirmation

Directo can be configured so that tangible and intangible asset type asset card must be confirmed if needed. Its purpose is to provide a more flexible process configuration option in situations, where is a time lag between the asset purchase and registration for an example and it is desired to be precise at the time of the transaction. Or someone has to validate it before registering the asset e.t.c.

- The fixed asset card confirmation creates a financial transaction.
- The confirmation possibility (obligation) also means that depreciation is not taken into account for unconfirmed cards.
- Value corrections cannot be added to the confirmed fixed assets card. A new fixed asset card must be created for value corrections and the fixed asset code to which it is linked must be entered to the master cell.

Unconfirmed fixed asset cards are included in the Asset Depreciation and Asset List report.

4.1. Confirmation setting

Settings > System Settings > Asset Settings are the following settings that affect asset confirmation

- **Asset must be confirmed** - options **No, Yes**
 - **No** - the asset card does not need to be confirmed;
 - **Yes** - the asset card (tangible asset, intangible asset) must be confirmed so that it can be depreciated.
- **Asset registration account** - account which is used on the credit side of asset registration transaction. It is necessary to add asset registration account suspense account to the account chart (Chapter 4.2. Use).

If the asset confirmation requirement is turned on, a **Confirm** button will appear in the new asset header:

If the asset module has already been used and the assets have been depreciated, should be contacted with Directo Customer Support, if the asset confirmation feature is intended to take into use. Customer Support helps to mark assets in use as confirmed. Old cards independent confirmation creates also registration transactions, which would damage or clutter existing accounting.

4.2 Confirmation use

4.2.1. Fixed asset is purchased with purchase invoice

Entering a purchase invoice is similar to creating unconfirmed fixed asset card, but the asset registration account is marked in the line of purchase invoice (4.1. Confirmation setting). Purchase invoice confirmation creates transaction, where the cost of fixed assets is posted: **debit- asset registration suspense account**. The cost of fixed asset does not immediately go to the fixed asset account, but remains on hold in the suspense account. This transaction takes place on purchase invoice operation date.

Fixed asset card can be created with corresponding button from purchase invoice or manually. If the fix asset card is filled in with important information (Creating a new fix asset card), the card can be confirmed by pressing **Confirm** in the asset card header. New opened window may ask for a number series into which to create a financial transaction. Transaction is made, which records the fixed asset in acquisition cost and credits the suspense account. Transaction is created with asset card calculation start date.

4.2.2. Fixed asset is acquired with another transaction

Creating fixed asset card from **Expense** applies the same rules as creating the fixed asset card from purchase invoice. The asset registration account is marked in the corresponding line of expense.

The asset registration account is selected to document account when creating fixed asset card from **Stock depreciation**

The fixed asset registration transaction is formed in confirming as follows:

Header				
Number	Type	Date	Description	
	'INV'	Fixed asset card Start date	'Asset '+[asset.code]+' ':'[asset.name]+' asset accounting'+ ' '+[asset.date]	
Rows				
Side	Account	Objects	Project	Sum
Debet	Fixed asset card Asset account	Card objects	Card project	Card purchase price
Credit	From System settings 'Asset registration account'	Asset card objects	Asset card project	Asset card purchase price

Finance - Transaction INV: 100419 Saved Last changed by (06.04.2022 at 10:47:05)

The Fixed asset card can also be opened from the confirmation until no depreciation or other transaction that creates financial transaction have not been made. Card can be opened with **Document opener** under **Maintenance**.

5. Fixed asset depreciation

Depreciation is calculated according to the method and rate marked on the fixed asset card.

5.1. Depreciation methods

The following depreciation methods are used

- Straight line
- Diminishing balance
- Units of production

Depreciation is calculated on the **straight line method** by default.

5.1.1. Straight line method

Depreciation rate is calculated from purchase price by straight line method.

$$\text{Depreciation} = (\text{purchase price} - \text{remaining value}) / \text{vara kasulik tööiga}$$

Example:

Fixed asset with purchase price of 120,000 is depreciated at 20% per annum using the straight line method, depreciates permanently in 5 years (every year 24 000, every month 2000).

5.1.2. Diminishing balance method

With diminishing balance method the fixed asset base value decreases each year by the depreciation amount.

Example

Fixed asset with purchase price of 120,000 is depreciated at 20% per annum using the diminishing balance method, is depreciated in the first year 24 000 (2000 in month), in the second year 19 200 (1600 in month) (20% 120 000- 24 000) etc. The Fixed Asset is never depreciated permanently with this method.

5.1.3. Units of production method

If depreciation is calculated by the unit of production method, then the annual depreciation percentage can not be entered in the fixed asset financial data, but a usage limit is set in the line „Units of production“. Can be used calculating depreciation with proportion.

Depreciation is calculated automatically by units of production method, if the usage limit number is filled and amort % under fiscal data change to 0.

Fixed asset EV16 Saved Last changed by (06.04.2022 at 11:09:47)

Code EV16	Name Production bench	Class 125301	Class name Tootmisseedmed	Type TA - tangible assets	Calculation method Units of production <input type="checkbox"/> Auto

No.	Date	Usage
1	31.01.2022	160.00
2		

All usage limit and how much fixed asset was in use in this month are taken into account when calculating depreciation. According to this the depreciation percentage and the amount are calculated with formula:

$$(\text{use per month} / \text{usage limit}) * \text{purchase price}$$

$$(160 / 10\ 000) * 200\ 000 = 3200$$

5.2. Depreciation calculation

Depreciation transactions can be created after entering fixed asset cards. All the fixed asset cards must be filled correctly.

Depreciation can be calculated to all fixed assets in the fixed asset browser with button **Depreciate**.

Fixed assets

Depreciation can be calculated to one fixed asset on fixed asset card with button **Depreciate**.

Fixed asset 7778 Saved

From the opened window can be selected:

Enter transaction date and range

Range:
 Asset:
 Class:
 Object:
 Project:
 Month: Year:

- **Range**- transaction range in which the transaction must be made (usually comes automatically);

- **Asset**- fixed asset code to which depreciation is calculated. Must be filled in if want to depreciate only one fixed asset. Must be left blank, if want to depreciate all fixed assets at the same time;
- **Class** - depreciation can be calculated by class;
- **Object** - depreciation can be calculated by objects or by object combinations class;
- **Project** - depreciation can be calculated by projects;
- **Month** - for which month the calculation and depreciation is created.

! If the asset, class, object, project fields are left empty - depreciation is calculated to all fixed assets. Generated transaction will open after pressing the button OK:

Finance - Transaction INV: 10024

No.	Account	Object	Project	Description	Debit	Credit
1	125369	R11		A103: Computers and computer systems depreciation 01.09.2022:30.11.2022		99.99
2	551136			A103: Computers and computer systems amortization 01.09.2022:30.11.2022	99.99	

Depreciation cost is shown in the income statement only for the last month, when calculating several months depreciation at once, and the asset module reports can only be compared with the financial reports as of the end of the last month.

If the residual value of the fixed assets is 0 and a value correction is added to the fixed asset, then the start date of the calculation must be the 1st of the month to calculate the depreciation from the same month. If you want to start depreciation calculation from the next month, put the last date of the month.

5.2.1. Estimated depreciation end time and last transaction

The FISCAL DATA tab on the fixed asset card shows the expected end of depreciation, the last depreciation date and transaction number. The depreciation transaction link opens in the fixed asset header.

E end of depr. 31.12.2021	Last depr. date 31.03.2020	Last depr. no 100252
--	---	---

5.2.2. Depreciation can be calculated on the negative purchase price of fixed asset

1. required using the gross grant method RTJ 12 (17)
2. within a group when assets are sold from one related party to another at a non-market price
3. other specific needs

5.2.3. Depreciation rounding

The depreciation rounding transaction is indicated by the system settings

Asset amortization rounding 0

Example - 0 decimal places

<input type="checkbox"/> No. ^	Account	Object	Project	Description	Debit	Credit

2	551136			A103: Computers and computer systems amortization 01.02.2023:28.02.2023	33.33	

5.2.4. Periodized amortization

System setting → Asset amortization will be periodized → yes/no
allows to calculate depreciation for several months at a time and periodizes the financial transfer between months.

If the fixed asset depreciation transaction is made for one month, the depreciation transaction is the same for both system settings.

5.2.4.1. Periodized amortization

System setting → Asset amortization will be periodized → yes

Fixed asset depreciation for several months:

- Every months cost will also be in a correct period in income statement, when calculating periodized amortization for longer period at once.
- **The Depreciation report** shows the depreciation expense per month.
- **The depreciation report** is comparable to **Balance sheet** and **Income statement**.

Example

- Depreciation period 01.04 - 31.05.22

Finance - Transaction INV: 100434 Saved

Last changed by (08.04.2022 at 08:54:32)

4	551136			Periodized Computer52: Computers and computer systems amortization 01.05.2022:31.05.2022	277.78					1131	

5.2.4.2. Non - periodized amortization

System setting → Asset amortization will be periodized → No

The setting is required if the previous months are already locked and depreciation has not been calculated - then the full depreciation expense should be posted in the open period.

- If depreciation is calculated for a longer period at a time, a financial entry is made for the whole period with the end date of the last month.
- **In the income statement**, the entire depreciation transaction is in the last month.
- **The depreciation report** shows the monthly depreciation expense per month..
- **The depreciation report** is not comparable to the **Balance Sheet** and **Income Statement** in the intervening months. Balance sheets are correct at the end of last month.

Example

- Depreciation period 01.06 - 31.06.22

Finants - kanne INV: 100263 Salvestatud

Tüüp: INV Number: 100263 Aeg: 31.07.2022 Seletus: Inventari amort 01.06.2022:31.07.2022

eri valitud Kustuta valitud Massasetaja Aseta retsept Jaga ressurssidelt

Nr	Konto	Objektid	Projekt	Sisu	Deebet	Kreedit	KM koor	Aeg
	> Otsi	> Otsi	> Otsi	> Otsi	> Otsi	> Otsi	> Otsi	> Otsi
1	125319			J1904: Transpordivahendite akumulatsioonid kulum 01.06.2...		134.00		
2	551131			J1904: Transpordivahendite amortisatsioonid kulu 01.06.2...	134.00			

5.2.5. Depreciation can be calculated either at the remaining value or at the end of the calculation

System setting „Asset amortization up to: „Remaining value“/ „End date“

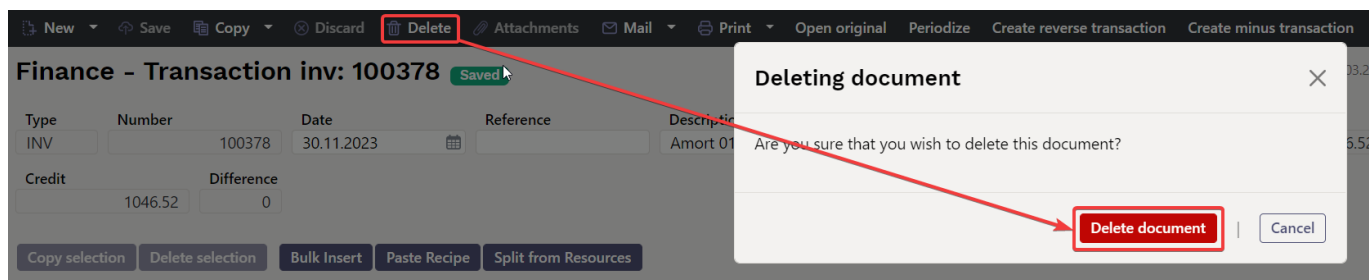

Asset amortization up to ☐ remaining value ☒ end date

- **Remaining value** - depreciation calculation will be ended, when fixed asset residual value is equal to remaining value.
- **End date** - if the End date field is unfilled on the fixed asset card, no remaining value is calculated, but fixed asset is depreciated further until the residual value is 0. But if the end date is filled, no depreciation is calculated for the following months.

5.3. Deleting the depreciation transaction

If the generated depreciation transaction is not suitable (wrong period was selected, some fixed asset was forgotten to be taken into account, etc), then the depreciation transaction can be very easily

deleted and re-created. To delete, press the „Delete“ button on the transaction. We answer „OK“ to the program question, if we are sure we need to delete the transaction:

5.4. Proportional depreciation

Allows to share depreciation cost between multiple object and/or projects at the same time over a given period.

5.4.1. Setting the first proportion

- **Proportion:** number field
- **Cost object:** object or list of objects with commas
- **Cost project:** option of the project tab, the code is placed
- **Start date:** validity start date
- **End date:** validity start date

Proportion % in numbers are entered in proportion tab to **Proportion** line. Number is placed automatically to the next row, so that total will be 100.

- Proportion tab does not need to be filled in, if depreciation cost is not wanted to divide when creating fixed asset card.
- Proportion can be changed on the fixed asset card until the first document related to this fixed asset is confirmed or depreciation is calculated.
- Start date will initially be calculation start date. Start date can only be changed on CHANGE document.
- Object and project are always taken from cost object and cost project field to depreciation and write-off accounts.
- If there is no proportion in the amortization transaction and the proportion is unfilled, i.e. the proportion is 100%, then the depreciation expense account takes object and project from cost object and cost project field on fixed asset card.
- If there is proportion - (cost) objects and project are taken from cost object and cost project column to proportional amortization transaction. Rounding would go to a larger number.
- If there is proportion - (cost) objects and project are taken from cost object and cost project column to proportional write-off transaction. Rounding would go to a larger number.

Proportion example

The car is used in the sale and warehouse departments at the same time, and the cost is shared between 30% of the sales department and 70% of the warehouse department.

5.5. Proportional write-off

Write-off is accelerated depreciation. If the depreciation is divided by proportions on the fixed asset card, the write-off transaction is also made taking into account the proportion.

If write-off is wanted to transfer without calculating the proportion or to other objects, a CHANGE document is need to be done before, on which the proportional calculation is terminated and only after that the write-off is made.

5.6. System setting - Asset history preview feature

If the system setting „Asset history preview feature“ is enabled, is possible to create s.c. simulation transactions (only visible in the asset module) for depreciation calculation.

Required System Settings → Asset Settings

- How many months ahead the Asset history is generated (number - in example **24** months)
- Asset history preview feature - **yes**

The fixed asset card shows the future of depreciation.

5.6.1. Diminishing balance method- precalculated depreciation

The activities tab shows the calculated depreciation.

5.6.2. Straightline method - precalculated depreciation

The activities tab shows the calculated depreciation.

5.6.3. Example - fixed asset history is generated 2 months ahead

If the system setting - fixed asset depreciation is generated 2 months ahead- in on, then

- no financial transaction is created
- asset history report shows one month depreciation in months generated ahead
- if depreciation transaction is forgotten to create, the data in balance sheet and asset history report are not the same

6. Address on fixed asset and low value asset card

6.1. Setting the addresses

Addresses can be configured Settings → Personnel Settings → Departments. Every address can have its own code. The address code **location** is placed on the fixed assets and small assets card. Enter the accuracy of the locations as needed. Use additional fields for location codes as desired.

Examples : Company has departments in Tallinn, Tartu, Võru.

- Location codes by city - TALLINN, TARTU, VORU
- Location codes by address - MOISA_4
- Location codes by floor - MOISA_4_7k, MOISA_4_9k
- Location codes by rooms (room numbers or names) - 01_ROOM, 02_ROOM

6.2. Entering addresses location codes

Address settings Settings > Personnel Settings > Departments Add location addresses on departments card at the bottom of the page. Enter asset location addresses to address rows.

Administration

CODE: OFFICE
 NAME: Administration
 SUPERIOR: JOHN »

Addresses

Code	Street	House	Apartment	Place name	City/Parish	County	Zip	Country
01_ROOM	Park	5		Room 1	Malton	Yorkshire	45878	En
02_ROOM	Park	5		Room 2	Malton	Yorkshire	45878	En

- **Code:** location code, can be entered manually
- **Street:** text field
- **House:** text field
- **Apartment:** text field
- **Place name:** text field
- **Zip:** text field
- **City/Parish:** text field
- **County:** text field
- Entering the location code for the first time, fill in all the address fields
- The same location code can be entered under the next department. In this case, enter the location code and the address fields will be filled automatically.

6.3. Use of address location codes

If departments are not in use, create a GENERAL department under which to enter all the desired location codes

- If a department is marked on the Fixed Asset and Low Value Asset card, you can select the locations marked under that department
- If a department is not marked on the Fixed Asset and Low Value Asset card, you can select all the locations
- Locations cannot be associated with objects or projects

6.4. Display location fields on the Fixed Asset and Low Value Asset card

The location code is in the data group **LOCATION** on the fixed asset card. More fields of the location code can be displayed under the Fixed Asset card fine-tuning - Asset location additional info fields.

7. User management

Fixed assets can be linked to users with purpose to have an overview who owns or is responsible for the asset. Users are managed using the fields **User** and **In charge** on the asset main page or in the tab **Users** :

7.1 Simple user management

Simple user management can be organized using the **User** and **In charge** fields. Persons from the Directo personnel register can be placed in these fields, who then will use or be in charge for the asset.

You can change the person codes on the fixed asset card with simple user management, but the data history will not remain and the reports will not be viewable.

7.2 Detailed user management

More detailed user management can be done using the **Users** tab of the assets and the **Assets** tab of Personnel Card.

On Fixed Assets card **Users** tab can edit and add rows to the **Resources** tab in Personnel card.

If the system setting The asset card is editable=NO is used, the user data can only be changed through an additional document [Fixed Asset change](#)

7.2.1 Setup and usage options

Relation between assets and personnel assets

It is necessary to set the assets **Types**, in order to save assets lines to personnel card tab **Assets**. A list of asset types is created Settings→Personnel settings→Data Types→Asset:

https://login.directo.ee/ocra_directo_jane/settings2.asp?tyyp=PERSONAL

This table creates a list of asset groups as we want to systematize them in the Personnel module. This list does not have to directly match with the list of asset classes.

Rows without an asset type cannot be saved under personnel card assets. Read more in the Personnel Module Guide.

For **Asset class** is selected to, which personnel module asset type the given class corresponds to:

The fixed asset classes must be compiled in such detail, so that type comes correctly from class, if you want to use the fixed asset types on the personnel card.

Setting: Asset has one active in charge user

Settings→System settings→Asset settings→Asset has one active in charge user: specifies whether there can be multiple end-dated rows in the Users tab at one time or not. In other words, can there be multiple users at the same time. Setting options: yes, no:

Yes- When a new user is added to the table, the previous user's row is „closed“ and its end date is automatically set to one day less than the new user's start date: adding a new user to the table, the previous user's row is „closed“ and its end date is automatically set to one day less than the new user's start date:

<input type="checkbox"/>	Nr	Tüüp	Kasutaja	Kasutaja nimi	Algus kp.	Löpp kp.	Kommentaar	Väljastaja	Väljastaja nimi
		Otsi	Otsi	Otsi	Otsi	Otsi	Otsi	Otsi	Otsi
	1	Arvuti	TIINA	Tiina Kask	01.06.2021	30.09.2021	Tiinale antud tähtsate tegevuste jaoks	JAAN	Jaan Tamm
	2	Arvuti	KAIE	Kaie Kruus	01.10.2021		Kaie on rohkem vaja	JAAN	Jaan Tamm

Only the last line can be edited and deleted (previous users lines are locked). If you delete the last line, the previous one becomes the active line and can be changed. Also the end date is removed from it.

No- all lines are freely editable. Except for required fields that must be filled (Type, User, Start date). This means that the asset has multiple concurrent users and the asset is on a several personnel card.

System setting: Asset and personnel relation

Option **user** and **in charge** is intended for use, when the system setting Asset has one active in charge user=**Yes** is selected.

Specifies which field (user or in charge) on the fixed assets tab is updated automatically, when a new user is added to the users tab (the field is locked and cannot be changed manually). This means that the selected field (user or in charge) always has the currently active user or in charge user.

Option **No relation** is intended for use, when the system setting Asset has one active in charge user=**No** is selected, then the fields User and In charge can be changed freely.

7.3. Reports

ON TÄIENDAMISEL !!

The reports **Asset list** and **Asset history** can be taken by a valid user or in charge user. It means the reports take into account the user / in charge user that are on the asset main page.

Therefore, it is reasonable to turn on the system settings **Asset and Personnel Relation** so that the Users tab active user is also a valid user or a in charge user on the main page.

Kood	Algas	Kasutaja	Klass	Objekt	Projekt	Osakond	Vastutaja	Kood	Nimetus	Kommentaar	Ribakood	Seerianumber	Kogus
ARVUTI46	15.05.2021	KAIE	125361				MALLE	ARVUTI46	Arvuti Dell				1.00

8. Asset actions

Asset actions codes are created to monitor different fixed assets actions.

For example, in the case of a purchase, the default code is „purchase“, the code can be changed before the first depreciation calculation or follow-up documentation is made.

Actions can be used in reports. Some activities appear on the asset card only through additional documents - Fixed Asset change, Low value Asset change, Fixed Asset recalculation, Asset write-off, Asset inventory.

9. Fixed Assets register

Register allows to sort fixed asset cards, etc.

Buttons

- **Add new** - opens new empty fixed asset card.
- **Browse** - entering the fixed asset code in the Open code box, opens the fixed asset card.
- **Create depreciation transaction** - calculates depreciation for all fixed asset cards at once.
- **Update history** - updates the fixed asset depreciation history - possible to check on the card whether the depreciation was calculated correctly (if wrongly, then it must be made to transaction, deleted it and correct it).
- **Delete history** - deletes fixed asset future periods depreciation transactions which are calculated using the „Asset History Preview feature“ setting.

Fixed assets

>
Add new
Browse
Update history
Delete history
Create depreciation transaction

Buttons **Update history** and **Delete history** appear, when the asset system settings have been filled:

- Asset history preview feature - Yes
- How many months ahead the Asset history is generated - greater than 0.

If **Update history** is created with a future period date, then future period depreciation transactions are previewed on **Asset history** report, although no depreciation has been calculated.

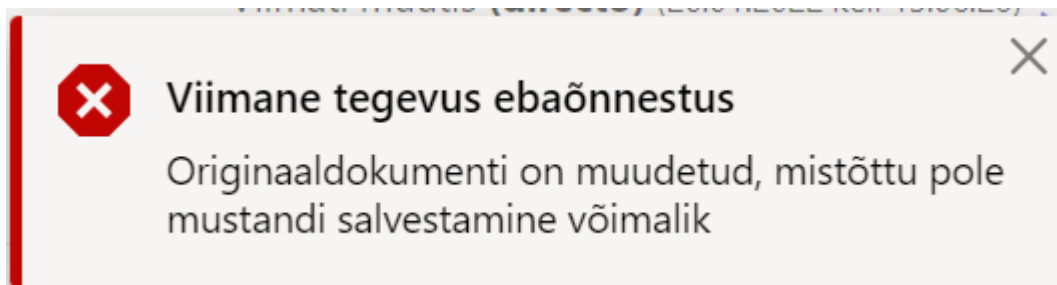

Asset history report still shows future periods depreciation, if **Update history** is prepared for a future period. Press **Delete history** in order for the Asset History report to show only the actual depreciation.

10. Frequently Asked Questions

10.1. How do I get rid of a draft?

- If a draft is left from document, cannot be saved and reports an error, then the error message can be removed by closing the asset card, reopening it and pressing **Discard**.

- In the Fixed Assets and Low Value Assets browser can display column **Draft** with button **Choose Columns** and filter the assets by draft.
- If there is a draft from document that you do not want to save, press **Discard**

All the changes, that have not been saved, will be deleted by pressing **Discard**.

10.2. Why can't the draft be saved?

- If the document does not have an active save button, may some fields contain code, that does not exist in Directos.

- If an error message is displayed when filling in the document, the document with such errors cannot be saved until the errors have been corrected.
