- **Event outcalling system** - depending on the settings, phone numbers in Directo become clickable links. Such functionality is available on sales invoice, sales order, purchase order, event documents, as well as supplier, customer and contact cards and related browsers. Possible options are:
 - **Baltcom**
 - **Telia VOIP** or the so-called Wise Speeches (read more <https://www.telia.ee/ari/kontor/kontori-telefon/aritelefoni-lisateenused#targad-koned>)
 - **Phone**, i.e. any application that the web browser considers capable of making calls. It can be a web-based VOIP application like Wildix, a Skype to Phone service, or even a regular cell phone that is synchronized with a computer. With this option, when you initiate the first call, a dialog opens allowing you to select the appropriate dial-out device

How do you want to open this?

If you choose Your Phone, Windows will guide you on how to pair your Android or Apple phone with your computer. This setting requires an active Microsoft account and Windows 10.

- Sündmusest arve tegemine kasutab võimalusel seotud lepingu tasumistingimust -
- Sündmusest tehakse alati töörida (Sündmuste aruande nädala ressursid vaatest uue loomisel) -
- Sündmusest tehakse alati töörida (uue sündmuse käsitsi loomisel) -
- Sündmust, millel on master, saab salvestada -
- Tegevusplaan arvestab lepingu rea lõpuga -
- Tegevusplaan kasutab lepingu rea projekti/objekti sündmuse jaoks -
- Tegevusplaani loodava sündmuse kasutaja -
- Tegevusplaanist tekkiva sündmuse tagasiside välja suurus -
- Tegijata sündmus saab avaja omaks -
- Tellimus avab endaga seotud tuleviku sündmuse -
- Tellimuse väljad, mis liiguvad tellimuselt sündmuse loomisel lisaväljadele -
- Tellimusel näidatakse temaga seotud sündmuse töid ridadena -
- Tööreale asetub alati sündmuse projekt -
- Tööride salvestamine muudab sündmuse alguse ja lõpu aega -
- Uuringul näha kliendi tuleviku sündmused -
- Vaba laoseis arvestab varianti -
