# Nominal Ledger

Nominal Ledger is the main tool of an accountant. It shows all transactions during the selected period.

## 1. Filters and filter options

- **Date start and end** - period of transactions.
- **Account start and end** - for filtering the accounts. It's possible to select a list of accounts (with comma list on start field) or a range of accounts (first account on start and last account on end field).

Account start 0 and account end Z shows all accounts in use.

- **Project** - filters only transactions with selected project.
- + choose project fields - possible to filter by different project fields.
- **Corr.Account** - correspondent account of the transaction.
- **Object** - filters only transactions with selected object.
- **Type** - object level type.
- **Language** - language selection for the report.
- **Change** - it is possible to filter transactions by the change entered in the field. Options: is bigger than, is smaller than, equals, does not equal.
- **Description** - description from transactions headers or rows. It's possible to use full description or just a keyword.
- **Reference** - transactions reference.
- **Customer** - customer code on transaction.
- + choose customer fields - possible to filter by different client fields.
- **Sort1** - different ways to sort the report result (Time by default). Options: Type, Number, Time, Date, Debit, Credit.
- **Sort2** - different ways to sort the report result, in addition to the first sorting (unsorted by default). Options: Type, Number, Time, Date, Debit, Credit.  
The sorting result may be different for Time + Number and Date + Number, because the time and transaction number may not be in the same order.
- **Transaction** - selection of transaction types.
- **Supplier** - supplier code on transaction.
- + choose supplier fields - possible to filter by different supplier fields.
- **VAT code** - Vat code filtering. Its possible to select one or all codes.
- **w/o level(s)** - excludes entries that have objects with a certain object level (number of the object(s) level must be entered).
- **Currency** - possible to filter transactions made in one currency. Exclusion and a comma list of

currencies also work (USD, EUR and !USD, EUR).

- **Subtotal** - subtotals with selected option will be generated. Each subtotal consists of transactions, opening and closing balances. The report also shows unchanged account balances for the selected date range. Options - object, project, customer, supplier, VAT code and currency.
- **Datafield** - finance account datafield.

## 2. Options

- **Show corr. acc.** - show correspondent accounts of the accounts in the transactions.
- **Only with balance** - show only accounts with balance (works only together with „with change” option).
- **Only sum** - show only total sums (Beginning balance, total Debit, total Credit, total change and closing balance) of the accounts in selected period, without transactions.
- **Mixed accounts** - the result of the report is displayed by transactions, not by accounts. Accounts are mixed.
- **With change** - shows only accounts with change in selected period of time.
- **Unbalanced** - shows only unbalanced accounts.
- **Levels** - separates objects in entries by levels, that way it is easier to view data, search for errors, or process in excel.
- **More info** - brings out suppliers code + name, quantity and project code (if it isn't already selected from fine tuning) columns.

- **Setting** - for choosing user's personal settings.
- **Excel table** shortcut F12 or Alt+E - opens the generated report in Excel.

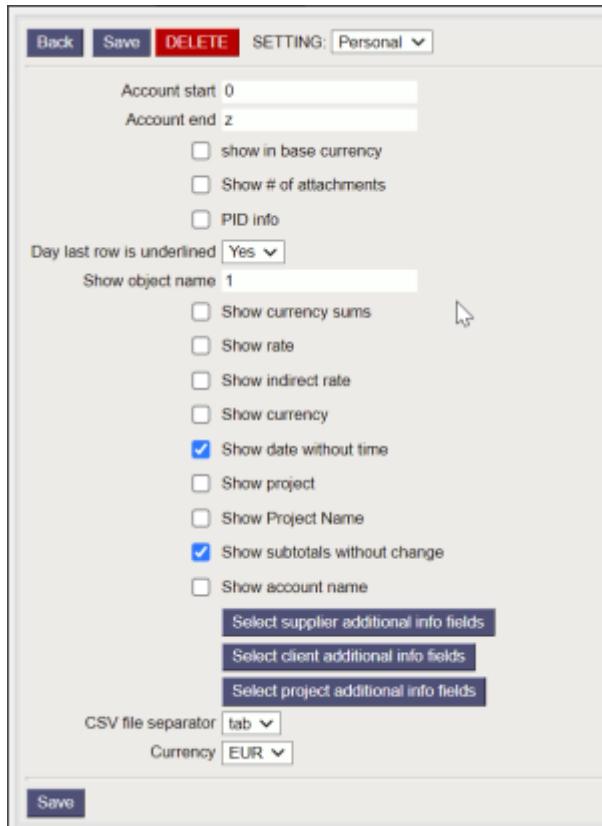

## Save the report in CSV format

- It is often necessary to view a general ledger report for a period that contains more data than the user's browser can display. In this case, the data must be exported as a CSV file for post-processing in, for example, Excel or other data processing software.

## 4.2 Showing currency amounts and exchange rates

It is possible to add currency amount and exchange rate columns to the report from fine tuning.

The screenshot shows a configuration window for a financial report. At the top, there are buttons for 'Tagasi' (Back), 'Salvesta' (Save), 'KUSTUTA' (Delete), and a dropdown for 'SEADISTUS' set to 'Isiklik'. Below these are several checkboxes:

- näita ka baasvaluutatas
- Näita manuste arvu
- OID info

Below the checkboxes are dropdowns for 'Päeva lõpu rida on allajoonitud' (Today's last row is summarized) set to 'Jah', 'Näita objekti nime' (Show object name), and 'Valuuta' (Currency) set to 'EUR'. There are also checkboxes for 'Näita valuuta summasid' (Show currency summary) and 'Näita kurssi' (Show exchange rate). A 'Salvesta' (Save) button is at the bottom left.

Picture(4)

Those values are displayed only on transactions rows. There are no total values for these columns. If option **only sum** is selected, those columns wont appear.

## 4.3 Subtotals

**Subtotal** filter will generate subtotals with selected option. Each subtotal consists of transactions , opening and closing balances. The report also shows unchanged account balances for the selected date range.

Example: Subtotals by customer (partial excerpt from the report):

The screenshot shows a report titled 'Finants - Peraamatu aruanne' with various filters applied. The filters include date ranges (Aeg: algus 01.07.2021, lõpp 27.07.2021), account numbers (Konto: algus 0, lõpp z), project (Projekt), language (Keel), client (Klient), and currency (Valuuta: EUR). The 'Vahesumma' (Subtotal) section is highlighted with a red box, showing 'Kliendi lõikes' (Customer wise) and 'Ühik/täpusus 0,01' (Unit/Period 0,01). The report table below shows transactions for customers 113101, 212375, and 411001, grouped by customer with subtotals for each.

## 4.4 Resetting balances

It is possible to reset balances from the past. To do this, a financial transaction must be created with desired date, for example, at the end of the year.

### Example

## Nominal Ledger shows project with balance:

The screenshot shows the Nominal Ledger interface with various filters applied. The 'Vahesumma' (Balance) and 'Projekti lõikes' (Project) dropdowns are highlighted with a red box. The results show a balance of 22,00 for the 'SUUR: Suur projekt' account.

	0,00	0,00	0,00	0,00
<b>SUUR: Suur projekt</b>				Algsaldo 22,00
				Deebet 0,00
				Kreedit 0,00
				Muutus 0,00
				Löppsaldo 22,00

Kulus 1 sekundit

Picture(5)

Next step is to generate a report with longer period and with filters such as the ones in the picture 6. The result shows which transactions the final balance consists of.

The screenshot shows a detailed transaction report for the 'SUUR: Suur projekt' account. It lists individual transactions with their dates, descriptions, and amounts, contributing to the final balance of 22,00.

Picture(6)

## Financial transaction resetting the balance:

The screenshot shows a financial transaction window. A new transaction is being created with the number 1000018 and date 31.12.2018. The transaction details show a debit of 32,00 and a credit of 10,00, resulting in a final balance of 22,00.

Picture (7)

The F2 key in the Nominal Ledger window opens a new financial transaction.

If for example an object has been deleted, a warning will be displayed when the financial transaction is saved, but the transaction will still be saved.

## 4.5. Only with balance

If an account has a lot of transactions and there is a need to check only transactions that has closing balance for example by supplier. It is possible to choose Subtotal by Supplier and only with balance, then all suppliers that have closing balance 0 are excluded (only sum filter must also be chosen).
