Folders settings 3

Folders settings

- **Uploaded Digidoc (ASICE) container file gets date from last signature in file** - options No, Yes
- **User groups who can see attachments in Folders document tree** -
- **Folder files statuses** - file statuses/additional characteristics are determined. In a comma-separated list, the first word is the common name of the following list. „Direction“ in the example is the file identifier and below it is the option INSIDE, OUTSIDE.
- **Folder mail attachment prefix for filename** - when sending a file by e-mail through document management, the file name is prefixed with the extension specified in the settings, if the option is Our ref.
- **Folder prefix length** - number field
- **Folder saver verifies that file name is unique within the folder** -
- **Folder Kind** - possibility to create different types of folders. Comma separated list.
- **Missing mandatory relation still allows user to save by pressing the save button second time** - option No, Yes
