1. Purchase invoice buttons

1.1. Unconfirmed purchase invoice header buttons

- Close closes the document, after checking if the document has unsaved changes
- **New** opens new blank document. Checks in advance if the previous document contains unsaved changes.
- **Copy** makes a copy of the document. It means new document is created, where most fields are filled in as in the source document (range of copying depends on the system setting Document copy selection)
- **Confirm** confirms document if save button is pressed after confirm button. As a result, a transaction related to the purchase invoice is automatically created
- Save saves the document
- Mail an e-mail address must be entered first Settings → Personal settings → User. Sends a printout of the purchase invoice by e-mail. By right-clicking you can choose between existing printouts
- **Print** prints a printout. After pressing Print, a document preview is displayed briefly and the printer selection window opens. By right-clicking you can choose between existing printouts.
- Delete deletes unconfirmed document
- Paperclip allows to link attachments to document
- Forum you can read and write about Directo, also can start own forums within company
- **Event** creates an event related to the purchase invoice. The number of related events is shown in the upper right corner of the document and can be opened from a link

- **Stock Receipt** allows to create an income document directly on the purchase invoice. The generated stock receipt is automatically filled in with the data related to the vendor and the purchase invoice.
- **Data from e-invoice** opens Dokumentide transpordi register from where you can select an einvoice that partially fills in the purchase invoice fields

1.2. Confirmed purchase invoice buttons

- Credit generates credit invoice filled in on the purchase invoice basis
- Transaction opens a transaction related to the purchase invoice
- **Payment** generates tasumise to the purchase invoice
- CashOUT generates a cash withdrawal order with the information from the purchase invoice

2. Purchase invoice fields

2.1. Header fields

- **Number** document number. When making new document range code is shown there. By double-clicking or with Ctrl+Enter the right range can be selected
- **Vendor** vendor code. Can be selected from vendors registry by double-clicking or using Ctrl+Enter
- VAT Reg No vendors VAT registration number
- Vendors invoice Vendors invoice number
- **Bill to** vendor code to whom the purchase invoice is paid. Should be filled if it differs from the vendor code of the purchase invoice
- VAT Reg No bill to vendor VAT registration number
- **Survey** at the moment for the customers working with optics. Can be selected by doubleclicking or using Ctrl+Enter.
- Invoice date the date of the document, by right-clicking opens the calendar view
- **User** user generating the document is placed here automatically. Can be overwritten or switched with double-click. Pressing on the user opens the inserted user card.
- **Bank code** bank code, can be selected by double-click or with Ctrl + Enter from the bank register.
- **Purchase order** the number of the purchase order document to which the purchase invoice relates
- Payment terms tasumistingimus. Can be selected by double-clicking or using Ctrl+Enter
- **Object objekt**(id) ehk finantsdimensioon(id) related to the purchase invoice. Pressing on the object opens the inserted object card.
- Account No the bank account number where the purchase invoice will be paid to
- **S.Receipt** the number of the stock receipt document to which the purchase invoice relates.
- Due date payment deadline. Calculated automatically when the payment term is set

If the due date differs from the due date in the document transport, then it has a red exclamation mark in front of it

- **Cred account** debt account. Locates automatically from System settings > Supplier unpaid invoices or from vendor card, if debt account is filled on vendor card. Can be overwritten
- **Ref.** reference number
- **Credited invoice** if the purchase invoice is generated from another purchase invoice by using credit button, the number of the purchase invoice to be credited is displayed here
- **Op. date** transaction is generated with this time after confirming the purchase invoice. The time of the invoice date is automatically set here
- **Project** project code. Used if you want to link to a specific project. When a project is entered, the document is reflected in the project reports
- **Inventory** if the purchase invoice is related to inventory, you can add the inventory code here. If you want to see the inventory code in the ostuarved report, the inventory should be added to the line of the confirmed purchase invoice
- **Internal Invoice** the sales invoice number, which is filled in automatically when the purchase invoice is generated during the confirmation of the sisearve
- VAT date date, by right-clicking opens the calendar view
- Origin Country is automatically placed from vendor's card when filled
- **Deal type** choice of deal types
- **Expence** if the purchase invoice is related to an kulutusega, you can enter the expense number here. By double-clicking or with Ctrl+Enter the right expense can be selected
- Received invoice date is automatically placed here
- **Type** choice of purchase invoice types from system settings
- Status choice of purchase invoice statuses from system settings
- **Reclamation** by the amount entered here, it is possible to reduce the amount of payment created through the payment forecast
- Recl. description free text field for reclamation
- Split by resources divides the rows marked with the resource number
- Comment free text field for comments
- e-mail the default email address will be taken from here when emailing the invoice
- Int comment free text field for internal comment

2.2. Row fields

- Type option of expense type
- Account can be selected by double-clicking or using Ctrl+Enter, account number is placed
- Object object or list of objects with commas
- Project option of the project tab
- User option of the user tab, the code is placed
- Description account name, can be over-written
- Total purchase invoice net sum
- VAT code VAT code is placed
- VAT calculates VAT if VAT code is filled
- Item item code is placed, can be selected by double-clicking or using Ctrl+Enter
- Qty quantity
- StockID stock item code
- SN serial number information field
- PID purchase ID

3. Fine-tuning

Pressing the ketton on the right side of the header, opens the fine-tuning settings.

Back Save DELETE SETTING: Personal V

4. Periodization

The periodization functionality allows you to provide the necessary parameters when entering the original document, so that a periodic entry is made immediately after the document is saved. The periodization functionality has been applied to the **Purchase Invoice** and **Expense** to periodize expenses and to the **Sales Invoice** to periodize income. It can also be used on **Transaction**. Periodization can be started automatically. Automatic periodization takes place when confirming the document, if the corresponding setting is switched on and the required fields on the document have been filled in. Automatic periodization is applicable to **Purchase Invoice**, **Expense** and **Invoice**.

4.1. Periodization methodology

Periodization is based on two rules: monthly periodization and daily periodization.

Monthly periodization - period is divided into months and all the periodized parts are equal. Monthly periodization applies if applies the formula: periodization end date + 1 = periodization start date. Periodization period can be divided into full months. These periods are for example:

Example A. 01.02.2019-31.01.2020 (31. + 1 = 1. day) and the period is divided exactly into 12 months;

Example B. 20.02.2019-19.12.2019 (19. + 1 = 20th day) and the period is divided exactly into 10 months. \Rightarrow (01.03. until 30.11 = 9 months) + (20.02 until 28.02.2019 = 1/3 months) + (01.12 until 19.12.2019 = 2/3 months) = 10 months.

If the periodized sum is 300 EUR, then in example A the period sum is: 300 EUR / 12 months = 25 EURand the same sum applies to all periods. In example B the period sum is: 300 EUR / 10 months = 30EUR. 30 EUR applies to every month in period 01.03.-30.11.2019 (9×30 EUR). Between the periods 20.02 -28.02.2019 and 01.12-19.12.2019, which form an additional month, 30 EUR is divided so that the first period receives its share in proportion to the days remaining in that month and is based on a 30-day month \Rightarrow 30/30 * 20 days = 20 EUR. The periodization balance goes to last partial month 300 - 270 - 20 = 10 EUR.

Monthly periodization- applies if the period is not divided into full months or the rule periodization end date + 1 = periodization start date does not apply.

4.2. Automatic periodization of purchase invoice

Settings > System settings > Finance settings > Automatic Periodization must be activated to periodize purchase invoice automatically. Then fill in the periodized period on

purchase invoice (columns **Start** ja **End**). The corresponding account must be filled in the account that is periodized.

4.3. Periodization abort

Periodization abort is intended to reverse a periodization transaction if the circumstances or conditions of the periodization transaction change.

For example an insurance contract, which costs were periodized, was terminated and the money is partially returned to the insurant. One option to abort the periodization is to manipulate the periodized transaction and change its end date to reflect reality (change the cost of the periods during which the transaction was cancelled to claim). But this may not be the best way and not possible if the restriction of editing the transactions of the original documents is enabled under the user's rights (this restriction is strongly recommended). An alternative and better method is to use the **periodization abort** functionality on the purchase invoice.

4.4. Settings

System setting **Automatic Purchase Invoice Periodization Abort Account** allows to enter an account to which the aborted amount will be transferred. A receivables account is usually used in this situation. For better control, it is recommended to create a separate asset account, for example "Aborted Periodizations". Aborted amount will remain in this account after the periodization abort. If the amount is credited to a bank account, it is recorded in a separate transaction (D Bank; K Periodization abort). This setting is optional, offers convenience and it can also be done by entering the appropriate account during the transaction.

4.5. Use

Periodization abort can be applied to a purchase invoice that uses automatic periodization and the document must be confirmed. To abort the periodization there are buttons below the third dot at the top of the lines:

Close New Credit? Trans	_		_		PEN << Receipt	>>	Status Cor	nfirmed LOC	BOUT

Abort date- periodization abort date. This can be any date, which remains within the initial periodization period. This means it does not have to be the end of the month, etc. Periodization abort cannot be in a closed period.

Abort amount- the amount that will be refunded after the periodization abort;

Abort account- the account into where the remaining periodization amount is transferred. It will fill up automatically when the above system setup is completed. But it can be changed on the document as well.

It is mandatory to fill all these fields to abort periodization. When all the fields are filled, save the document to complete the periodization abort. As a result all the periodization abort data will be saved on the document and the transaction abort part will be modified:

- Abort date cannot be in closed period
- Periodization abort requires the right to change the confirmed purchase invoice Katkestamise läbiviimine eeldab kinnitatud ostuarve muutmise õigust.

5. Examples

5.1. Using account fields

As much account fields and datafields can be made visible on the purchase invoice as needed. It is user-based, so every user can choose different fields.

Column names and widths can be changed when setting the fields from finetuning

• **transaction objects** - the objects marked on the account as transaction objects are saved to the purchase invoice transaction line after confirming the document.

No Account	Trans. objects	Object	Project	User	Description	Total
1 511105	ADMIN, DAVIDD				Training costs	1500.00

• **object levels** - gives a reminder of which object levels must be filled. Otherwise, the purchase invoice will not be confirmed.

No Account	Object levels	Object	Project	User	Description	Total
1 511105	1, 2, 5	ADMIN, DAVIE			Training costs	1500.00

• **corr.acc.** - if the purchase invoice needs to be periodized, it is visible whether the account required for periodization is filled on the account card. Periodizing do not occur if the corresponding account is missing from expense account.

No Account	Corr.acc.	Object	Project	User	Description	Total
1 511105	113403				Training costs in 13th September	1500.00

• **account datafield** - reminders can be written - what to keep track of, what financial recipe to use, who to ask, etc.

No Account	Please notice !	Object	Project	User	Description	Total
1 511105	Only to PROD department	PROD			Production materials	6000.00

• several fields at once - as many fields as needed can be selected and in any order.
