Payment forecast

The report shows the purchase invoices that are partially or fully unpaid and the due dates. The last column shows how many days are the invoices overdue or how many days are left until payment. The report can be used to review or make payments for a specific day using the *Payments to* filter. It is also possible to make a payment directly in the report by pressing the **CREATE PAYMENT** button. The corresponding button appears after pressing the report button, except in the Summary view.

1. Filters

- Supplier purchase invoices with the selected supplier are filtered
- **Project** purchase invoices with the selected project are filtered
- Supplier class purchase invoices with the selected supplier class are filtered
- User purchase invoices related to the selected user are filtered
- **Object** purchase invoices with the selected object are filtered
- Payments to purchase invoices up to the selected payment term are filtered
- **Sorted by** the report is sorted according to the selection: Due date, Date, Supplier (code), Supplier (name), Object, Supplier Invoice, Sum, Status, Invoice No, Bank
- **Bank** filtered by the selected bank
- **Reason** reason in payment schedule
- **Proceeder** purchase invoice proceeder, the !USER exclusion also works.
- Currency purchase invoices with the selected currency are filtered
- **Type** purchase invoice type
- Subtotal unpaid sums are shown in groups
- **Reclamation** shows the sum and reason for the reclamation filled out on the purchase invoice in a separate column
- **Status** purchase invoice status
- **Show Cash Discount** shows the sum to be paid with cash discount in a separate column, if cash discount is indicated on the payment condition on the purchase invoice
- **Supplier prepayment** shows in a separate column the total sum of the supplier's prepayment. If there are several purchase invoices, then supplier prepayment total sum is shown on the each purchase invoice row.
- **Related customer`s balance** if the **Customer** code is marked on the supplier's card, the sales invoices submitted to the customer corresponding to the supplier are shown in a separate column.

2. Options

- View -
 - $\circ~\textbf{Normal}$ shows all purchase invoices on a separate row
 - **Status compare** shows all purchase invoices on a separate row, column **Status** (status on the purchase invoice) and table **Status comparison** appear.
 - **Summary** shows the report summarizing the past due and the amount due in the future in a 15 day period.
 - **Currency** the currency column, rate and sum in currency are shown. Currency in total and in comparison with the current exchange rate.

• Show -

- All all unpaid invoices
- W/O payments invoices that are not even partially paid

3. Links

- Number opens purchase invoice
- Supplier code opens supplier card

4. Payment schedule presentation in report

You can read about the payment schedule Payment schedule

The payment forecast shows purchase invoices to which a payment schedule has been applied as multi-line according to the schedule:

Supplier User Sorted by Due date Reason View Normal Show All	Project Object V Due date V Proceeder Reclamation V Supplier prepayment	Supplier Class Payments to Bank Currency Status (All)	Show Cash Discour	V V Subtotal V CREATE PAYMENT REPO	Selected EUR: 2 491 725 USD: 35 907 SEK: 54 363 Pcs: 329	2 🖲 🔒

The same purchase invoice rows have different due dates, sums to be paid and reasons.

Invoices can also be filtered by reason codes using the **Reason** filter.

5. Changing status

By selecting the 'Status compare' view, it is possible to change the purchase invoice statuses individually or in bulk.

To change one by one, select the appropriate status in the desired row and press the 'Save' button in the header.

To change with bulk, you have to select the preferred status from the column header drop-down menu and then mark which rows you still want this status for. Selecting the check mark will change the status to the same as in the header. To confirm, you must also press the 'Save' button in the header, which only changes the status of those rows with a checkmark.

It is also possible to use the checkmark column header checkmark, it assigns the preferred status to all rows and it is also possible to remove them.

6. Examples

Some purchase invoices are missing check marks

If there are no check marks after some purchase invoices when opening the payment forecast, then an **unconfirmed payment** or **unconfirmed netting** has already been created for these purchase invoices. Manually can add a check mark and create a new payment document from payment forecast.
