Payments

Payment is a document where payments to suppliers are indicated. Prepayments, purchase invoice payments and nettings can be created using payment document. New payment document can be also added from purchase invoice or using report „Payment forecast“. Payment reduces debt for supplier.

1. How to use

1. From the payments register create new payment by pressing „F2-Add new“ button. Fill in necessary fields. To keep the document, press „Save“ button. Payment should be confirmed by pressing „Confirm“ and „Save“ after the data is verified.

2. Payment can also be created from the report „Payment forecast“. For that it's necessary to fill in the filtering fields of the report and select „Report“. After the report is created, button „Create payment“ will appear. By pressing this button, new payment document will be created with prefilled fields. It's recommended to save the document. After checking all the data payment should be confirmed.

- **SETTING** - System, Personal
- **Supplier name goes to comment** - if selected, the supplier names on the payment lines will go to the payment header comment field (list separated with commas).
- **Export payment comment from p. invoice (when present)** - the purchase invoice header comment goes to the payment comment cell when exporting the bank payment order. If purchase invoices are joined, appears a comment list separated with commas. If not selected, the supplier number of the purchase invoice or a numbers list with commas will be entered in the comment cell.
- **Export does NOT join same supplier payments** - all the purchase invoices are paid with separate payment orders. If not selected and purchase invoices do not have different reference

numbers, then all the purchase invoices paid to the supplier are usually joined to one payment order.

- **Due date is pasted from Purchase Invoice** - allows to create a payment for purchase invoices to be paid in whole week. Payment terms that are on the rows are imported into the bank and the payment from bank are made according to the payment term on the rows.
- **Attachment preview** - possible to see the pdf-documents attached to the payment

5. Payment types

- **Usual payment** - unpaid purchase invoice payment to supplier, on payment rows corresponding purchase invoice is chosen.
- **Prepayment** - In case of prepayment to supplier, supplier code is added to the first row of payment, „Sum Paid” is filled with prepayment sum. Using prepayment is similar but sum is indicated with „-”. NB! In case of prepayment invoice number is not used. If paid sum is bigger than purchase invoice sum, then overpaid sum will be indicated as prepayment. In this case payment with two rows needs to be created. On the first row purchase invoice number, supplier and „sum paid” is added. On the second row supplier and overpaid sum on „sum paid” field are indicated.
- **Netting payment** - if existing prepayment needs to be used for paying purchase invoice. In this case payment with two rows needs to be created. On the first row of the payment purchase invoice number, supplier and sum is indicated. On the second row there is only supplier code and sum with symbol „-”.

After clicking „SEPA EST” a window opens where payment files can be downloaded. Next step will be logging into internet bank and selecting „Import of payments”. After that upload the file into bank. After confirming the payments in the bank the operation is complete. For successful payments export into bank, supplier's bank account and if necessary reference number, need to be filled in on payment rows.

Each click on „SEPA EST” button generates new values in „Payment No.” field. Later for relating bank statement and payment it's important to make sure that the newest export file is uploaded into bank.

Data order in Export file (SEPA EST) description:

1. Purchase invoice has Vendors invoice field filled and „Description” column is empty on the payment - Information in the file will be in form: „Nr.xxx” (xxx=vendors invoice number from the purchase invoice,,)
2. Description field is filled on the payment document- data from the description field will be indicated in the export file.
3. On the purchase invoice reference number is filled and description field is filled on the payment document - Reference number will be indicated in the export file

When working with different companies and their payments it's recommended to use System

setting > Company short code - in window title to distinguish different companies payment files more easily. Payment file name format is following:
Payment_number_company_short_code_payment_moce_code.

8. Sending payments to bank

LHV and Swedbank offer the possibility to send payments directly to bank.

8.1. Settings in Swedbank

- Company's legal representative has to add and sign digitally the service *Payments import to internetbank*

The screenshot shows the Swedbank internet banking interface. The top navigation bar includes 'Everyday banking' (highlighted with a blue box), 'Cards', 'Payment collection', 'Financing', and 'Insurance'. Below this, there are three main sections: 'Account', 'Payments', and 'Digital banking'. In the 'Digital banking' section, 'Swedbank Gateway' is highlighted with a red box. Below the main sections, there is a table titled 'Minu ettevõtte lepingud' (My company contracts) with columns for 'Leping' (Contract), 'Kasutajad' (Users), 'Alguskuupäev' (Start date), and 'Staat' (Status). One contract is listed with ID '188411' (highlighted with a red box), start date '03.10.2016', and status 'Aktiivne' (Active). Below the table, the contract details for 'Operaatori kanal - OÜ DIRECTO' are shown, including the operator 'OÜ DIRECTO' and registration code '10652749'. At the bottom, there is a checkbox for 'Maksete import internetipanka' (Import payments to internet bank) which is checked.

Keep in mind to remember (copy) the number of the contract

8.2. Settings and using in Directo

- Export channel needs to be defined on payment mode card. *LHV Connect* or *Swedbank GW*
- If using Swedbank, contract number needs to be added to the payment mode card field
EXPORT CHANNEL CONTRACT
- In user or user group rights section **Other** corresponding **Channel** rights need to be granted. Accordingly: *LHV Connect* or *Swedbank GW*
- Instead of **SEPA EST** button **Send to bank** button is now shown

- Clicking the button will send the payment to bank. A note about the transaction will be indicated accordingly:

Last changed by: VIUL 22.12.2021 14:08:00
 Electronically dispatched : LHV-SENDER (VIUL) 22.12.2021 14:22:42
- This process can take up to 15 minutes. (If the payment is sent, the date of the sending time will be shown in bold)
- Payments can be sent again if necessary. User has to delete previous payment manually from the bank.

9. Purchase invoice payment in currency

10.4. SEPA error message

login0.directo.ee says

File was exported but some rows were skipped either because they did not aggregate or had negative amount. Rows are aggregated when the following columns (indicated by green) have the same content (or not filled): Text, Description, Ref, Bank Account, Bank Cur, Date.

Ref. number visibility can be set under fine tuning (hammer). Change rows when needed and export again.

OK

This error message occurs when you want to send purchase invoices to a bank, but some purchase invoices have a different supplier name. In this case, purchase invoices with a different suppliers name will not be summarized.

10.5. Error message when importing payment to the bank - comment too long

If too many purchase invoices are paid together, the purchase invoice numbers will not fit in the comment field. Also, the payee does not know which purchase invoices have been paid. Xml fail adds all one supplier purchase invoices rows together and purchase invoice numbers are written to the comment field when importing one supplier purchase invoices to the bank. Bank issues a warning that comment is too long, if too many purchase invoices are paid together and reference numbers are not in use.

Possible solutions:

- use fine-tuning **Export does not join same suppliers payments**
- create multiple different payments with less purchase invoices
- use reference numbers
- send payment report to the supplier **Purchases - Reports - Payments**

10.6. Purchase invoice number added to the transaction row

To simplify verification, the Directo purchase invoice number is added to the Payment finance

transaction.

- Works with system setting Finance transactions from ledgers in rows - asset part too

The screenshot shows the 'FINANCE SETTINGS' interface with the dropdown set to 'asset part too'. Below it is the 'Payment 100120' form, which is confirmed. A red box highlights the invoice numbers 100168 and 100206 in the list. A red arrow points from this box to the transaction details for 'Finance - Transaction TASU: 100120'. The transaction details show a debit of 3840 and a credit of 0. The table below lists the transaction lines:

No.	Account	Object	Project	Description	Debit	Credit	Curren	Rate
1	111201			100206 Osauhing Directo		1440.00	EUR	1
2	111201			100168 Osauhing Directo		2400.00	EUR	1

4	212211			100206 Osauhing Directo	1440.00		EUR	1

- Works with system setting Finance transactions from ledgers in rows - debt part

The screenshot shows the 'FINANCE SETTINGS' interface with the dropdown set to 'debt part'. Below it is the 'Finance - Transaction TASU: 100120' form, which is saved. The transaction details show a debit of 3840 and a credit of 0. The table below lists the transaction lines:

No.	Account	Object	Project	Description	Debit	Credit	Curren	Rate	Cur. Debit	Cur. Credit	Supplier

10.7. The payment exchange rate transaction is created separately for each purchase invoice

Every purchase invoice exchange rate transaction is on a separate line and the purchase number and header object are added to the transaction line to track exchange rate gains/losses.

The screenshot shows the 'Finance - Transaction TASU: 100210' form, which is saved. The transaction details show a debit of 950.31 and a credit of 0. The table below lists the transaction lines:

10.8. Why the payment cannot be confirmed, although the object is marked on the row?

If the account object level is required and the payment row has object level object verify if in system settings are marked

- Finance settings - Payment uses Purchase Invoice object on rows - YES
- Payment settings - Payment uses header object for the Asset Accounts - NO

The screenshot shows a settings interface with two sections: 'FINANCE SETTINGS' and 'PAYMENT TERMS'. In the 'FINANCE SETTINGS' section, the option 'Payment uses Purchase Invoice object on rows' has radio buttons for 'no' and 'yes', with the 'yes' option selected and highlighted by a red box. Below it, 'Bank statement import automatically creates payment' is set to 'no' in a dropdown menu. In the 'PAYMENT TERMS' section, 'Payment alerts about double invoice in unconfirmed Payments' has radio buttons for 'no' and 'yes', with 'yes' selected. Below that, 'Payment uses header object for the Asset Accounts' has radio buttons for 'no' and 'yes', with the 'no' option selected and highlighted by a red box.

10.9. Payments - own right does not work

User group **own right** does not work when making payment. If it is necessary to give the user the rights to see only limited payments and the right to see only certain bank accounts, it is possible to

- Use the **user group extended right**
- Use the **limited right**
 - Make a separate payment modes for each bank account.
 - Rights can be limited in visibility rights.
 - Add the right to see limited payment rights under the user or user group rights.

>> Survey types ?
 >> Allowed payment modes ?

 If the cell is empty, everything is allowed. Comma separated list. If at least one code is filled in, only that code is allowed.

10.10 Payment extended right

- The user sees only payments where an object, indicated on personnel card, is marked in the header
- User group rights have document = payment marked extended right

If the user group has the Payment **Extended** right, the user can only see payments with the object on the personnel card.

 If the right is extended, but the object is not marked on the user's personnel card, then it behaves like an „All” right and sees all payments. If you add an object to the user, only payments with this object in the header will be visible.

11. Examples of system settings

11.1. System setting - Finance transactions from ledgers in rows

- **Finance transactions from ledgers in rows** - affects receipt, payment and expense due entry lines. Options:
no - rows with one account are summed to one row in the related finance transaction (if the

document rows do not have different objects or projects).

debt part - money flow is with one transaction row, the receipts/payments of customers/suppliers are in a separate row, as on the receipt/payment document, i.e. there is no rows consolidation on the debt side. Objects and projects are considered.

asset part too - money flow and customers/suppliers receipts/payments are in a separate rows as on financial transaction.

like payment file - the flow of money is the aggregate by customer/supplier, and on the ledger side, the invoice is reflected line by line, the invoice number is at each row beginning.

12. Prepayments via PreID (NEW PAYMENT DOCUMENT)

These payment rows, which do not refer to any specific purchase invoice, affect the prepayment balance in the purchase ledger and the customers prepayment balance in the balance sheet. Directo generates a unique prepayment ID or PreID value for each payment row with a positive prepayment sum, which can later be used to link the purchase invoice to a specific prepayment row. In the prepayment row can use the account to which the prepayment can be entered in the balance sheet - if the account is left empty, it will be taken either from the supplier's card in the payment row or if no account has been specified in the **PP account** field on the supplier's card, then from the system setting Supplier prepayments. Prepayment row object and project are used to create the transaction.

12.1. PreID on payment document

12.2. PreID prepayment use on the purchase invoice

The payment rows identified via PreID can be linked to the purchase invoice. To make a choice, must click on the Prepayment link in the purchase invoice header, which opens a section on the purchase invoice, where can see the PreID of the given supplier with an usable balance.

A double-click inside any of the Selected column fields will attempt to match that specific prepayment with purchase invoice prepayment uncovered sum.

12.4.3 Before PreID, netting the currency prepayment with the purchase invoice in the same currency on the payment document, if the prepayment sum is smaller than the purchase invoice

- if the prepayment is in currency, e.g. USD, then it should also be used in the same currency
- if the purchase invoice is smaller than the prepayment, then mark to the **Paid** field on the payment the sum that can be settled with the prepayment.

12.4.4. Netting - prepayment and purchase invoice are in different currencies

If the prepayment is in a different currency, it is possible to settle it with a purchase invoice in another currency. The currency in which the prepayment is made must be marked on the purchase invoice for payment.

- when using prepayment mark the prepayment with the same exchange rate as payment **Bank rate**
- the purchase invoice is paid in the same currency as the prepayment **Bank cur**
- when making purchase invoice payment mark the same bank exchange rate in which the prepayment was made **Bank rate**.
- use the netting payment as payment mode, which type is = equal

No.	Invoice No	Supplier	Name in bank	Supplier invoice	Object	Project	Bank Cur	Bank rate	Bank Sum	Fine	VC	Supplier Total	Supplier To

12.4.5. Netting - prepayment and purchase invoice are in the same currencies

If the prepayment is in the same currency as purchase invoice

- when using prepayment mark the prepayment with the same exchange rate as payment **Bank rate**
- the purchase invoice is paid in the same currency as the prepayment **Bank cur**
- when making purchase invoice payment mark the same exchange rate in which the prepayment was made **Bank rate**.
- use the netting payment as payment mode, which type is = equal
- exchange rates are calculated on the financial transaction

12.5. Previous prepayments

All the earlier suppliers prepayments are without a prepayment number and will be used without a prepayment number. The PreID functionality only works on a new Payment document.

12.5.1 How to see correctly the prepayments in the Supplier prepayments report

- If there are few prepayments, open previous prepayments, press save (e.g. add a dot to the comment field to create a save button) and confirm again. Start by over confirming the original prepayments, then move to the used prepayment documents.
- If there are lots of prepayments, use the OLD Payment document to link the old prepayments.
