Bailiffs 3

Bailiffs

You need the bailiff register to send the amounts withheld from employees' wages under seizures automatically to the bailiffs' bank accounts.

The register appears under `Settings → Personnel Settings →` **`Bailiffs`** when the class `Bailiffs` has been added to the setting `System settings > Wage Formula Classes`, and the same class has been selected in the setting `System settings > Bailiffs Wage Formula Class`.

When you add a new bailiff, fill in the following fields:

Code - the code of the bailiff. For clarity, use an easily understandable name.
Name - the name of the bailiff. Directo adds it to the wage payment.
Bank account IBAN [CHECK: field name] - the bank account number of the bailiff to which Directo sends the amount withheld from the employee.
