Testing 3
Test mode (dry-run) 3

Testing

- Web form: webupload.html
- Postman collection: get requests include all filters, put requests include XML examples. The token belongs in a Postman *environment*.

Test mode (dry-run)

Input can be sent in **test mode**, which processes the document and returns what **would be created or changed without saving**. Useful for validating the XML and settings before posting for real. The test-mode response shows the expected result per document and rows.
