Directo manuste hoiustamine Google Drive'is

Sobiv Google konto

Google Drive'i sidumine Directoga lubab ettevõttel hoida kõikide dokumentide manuseid ettevõtte enda loodud Google Drive pilvekeskkonnas, mis praegusel hetkel võrdub tasuta 15Gb vaba ruumiga.

Kõik dokumendid, mis tekkivad manustena mujalt, kui kasutaja enda poolt manustamise hetkel (näiteks liideste kaudu) sünkroniseeritakse taustal Drive-i. Kasutajal peab olema kehtiv ja aktiivne Google konto.

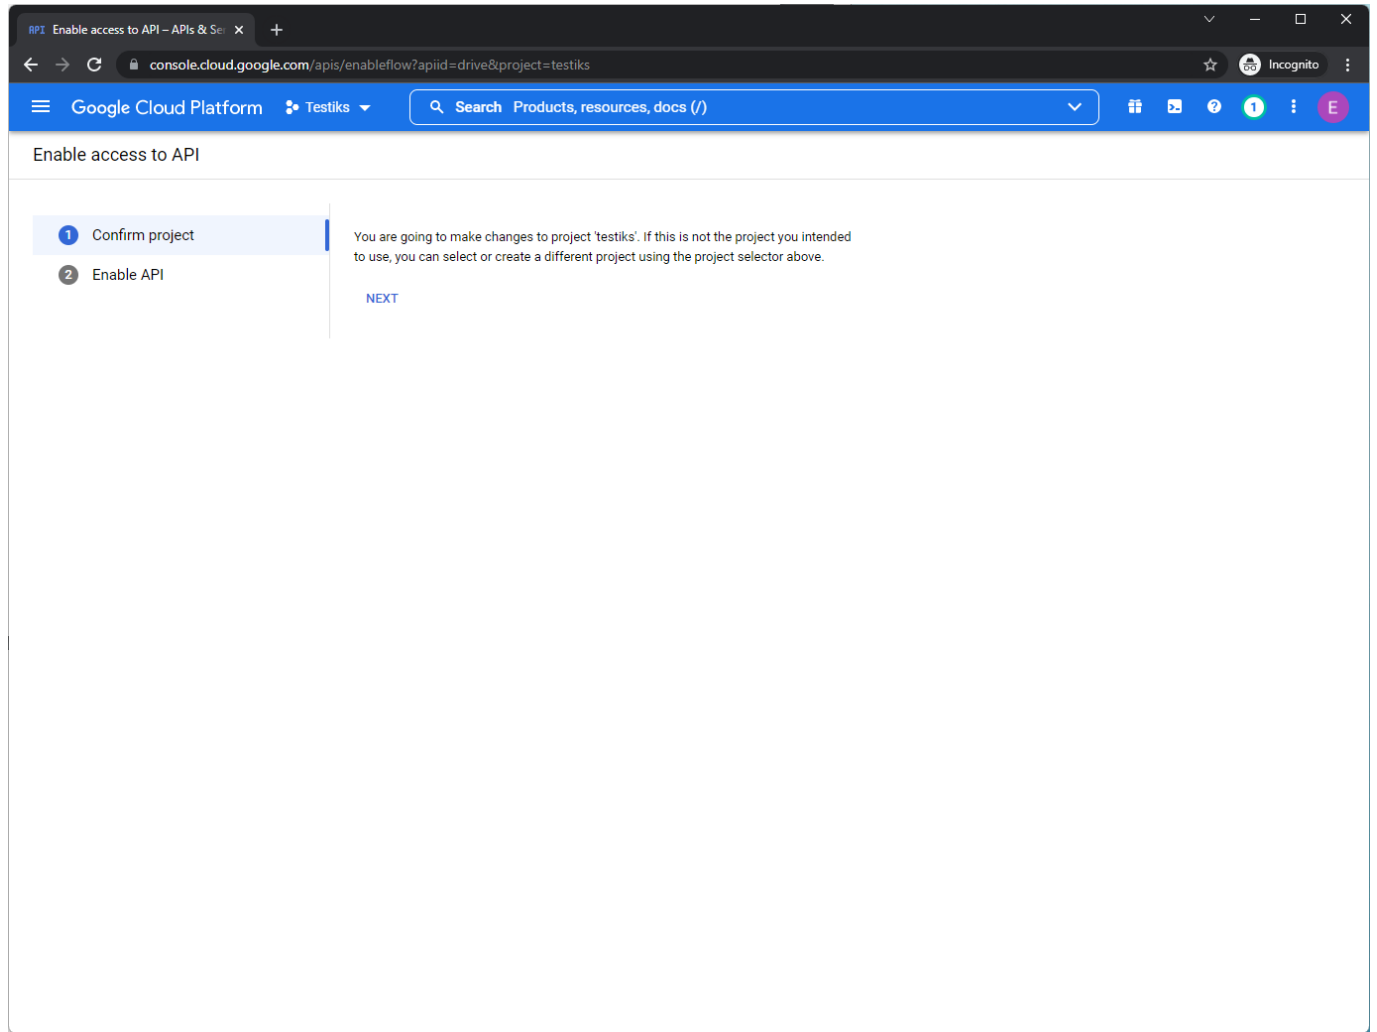

Ei tööta Google Apps for Work/Business/GSuite jms. Peab olema tavaline Gmail konto.

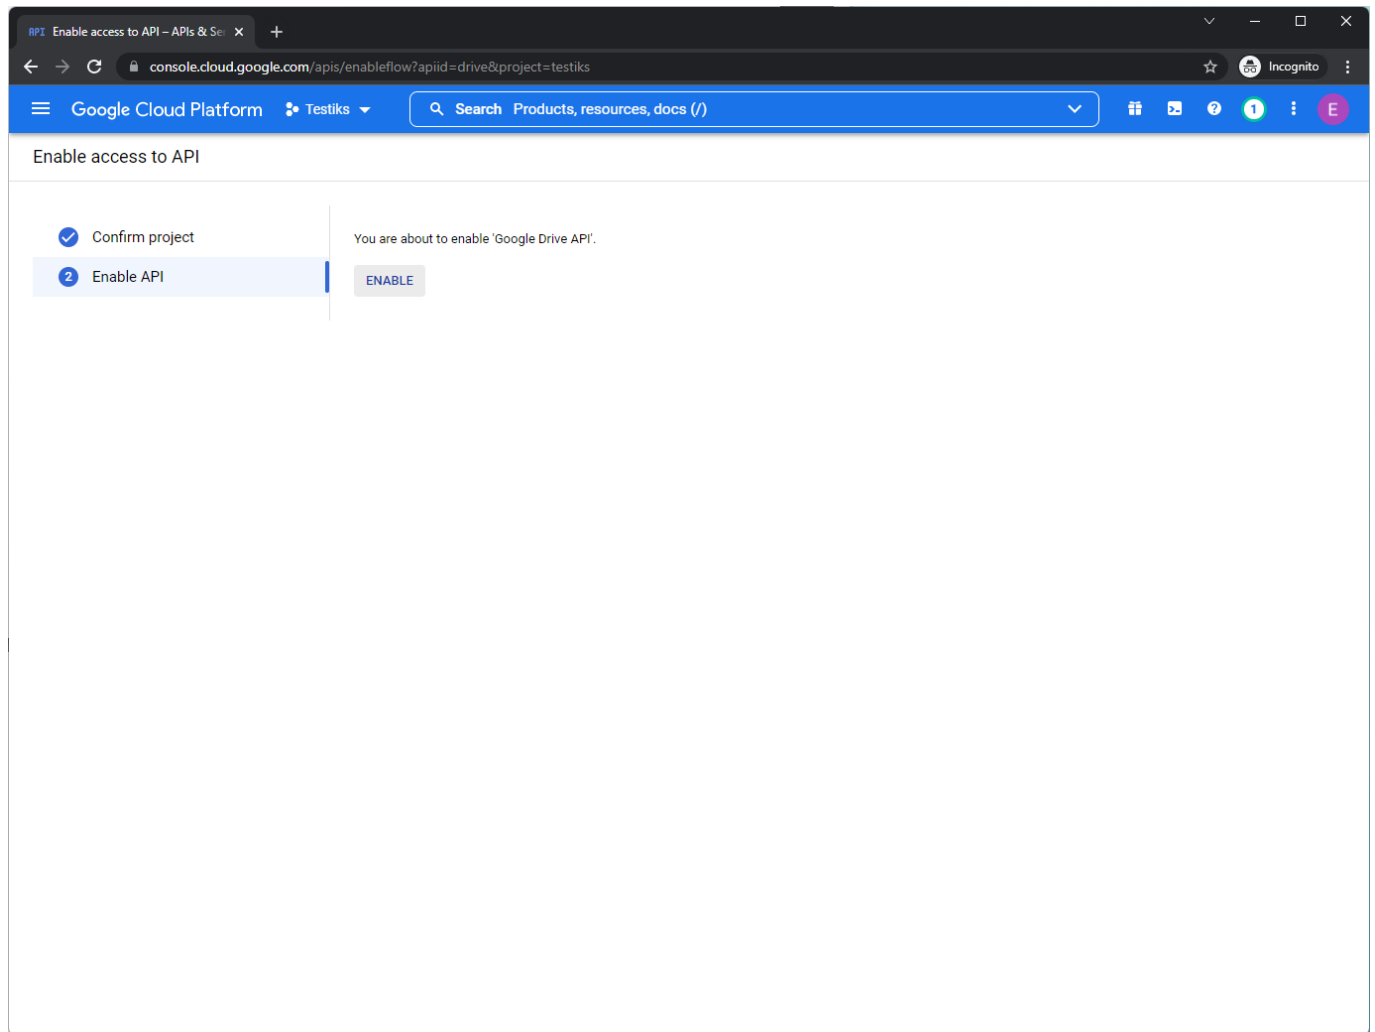

Uue konto saab luua <https://accounts.google.com/signup>.

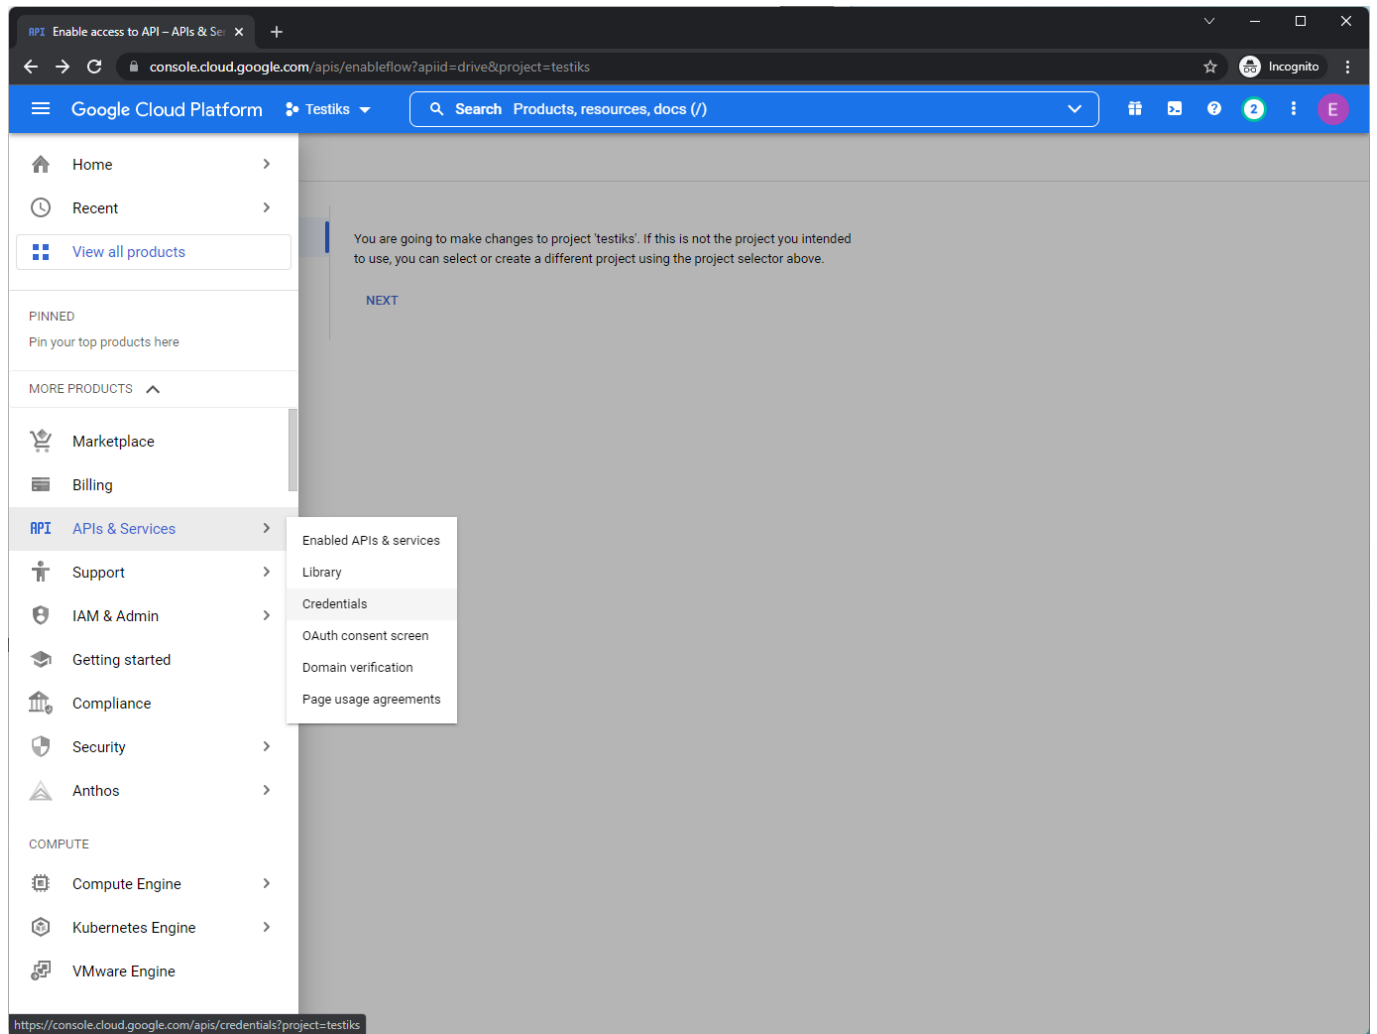

Kuna Google täiendab ja arendab oma teenuseid, siis Google teenused võivad erineda antud juhendis kirjutatust. Palun loe Google dokumentatsiooni kõige värskema info saamiseks! Kui märkad erinevusi siis palun võta meiega ühendust. ===== *Google rakenduse loomine ja seadistamine* ===== *Veenduge, et olete sisse logitud kontoga mida soovite Directoga sidumiseks kasutada (nt. minnes gmail.com ja sealt sisse logida). Kõik manused tekivad sisse logitud konto Google Drive keskkonda. Kõige lihtsam on kasutada lehitseja „incognito“ võimalust mis avatakse seisundis kus pole ühtegi aktiivset sessiooni seega järgmisele lingile vajutades küsitakse Teie käest millise kontoga Te soovite sisse logida. 1. Minge järgmisele lehele <https://console.cloud.google.com/flows/enableapi?apiid=drive> ja vajutage nupule „Next“.*

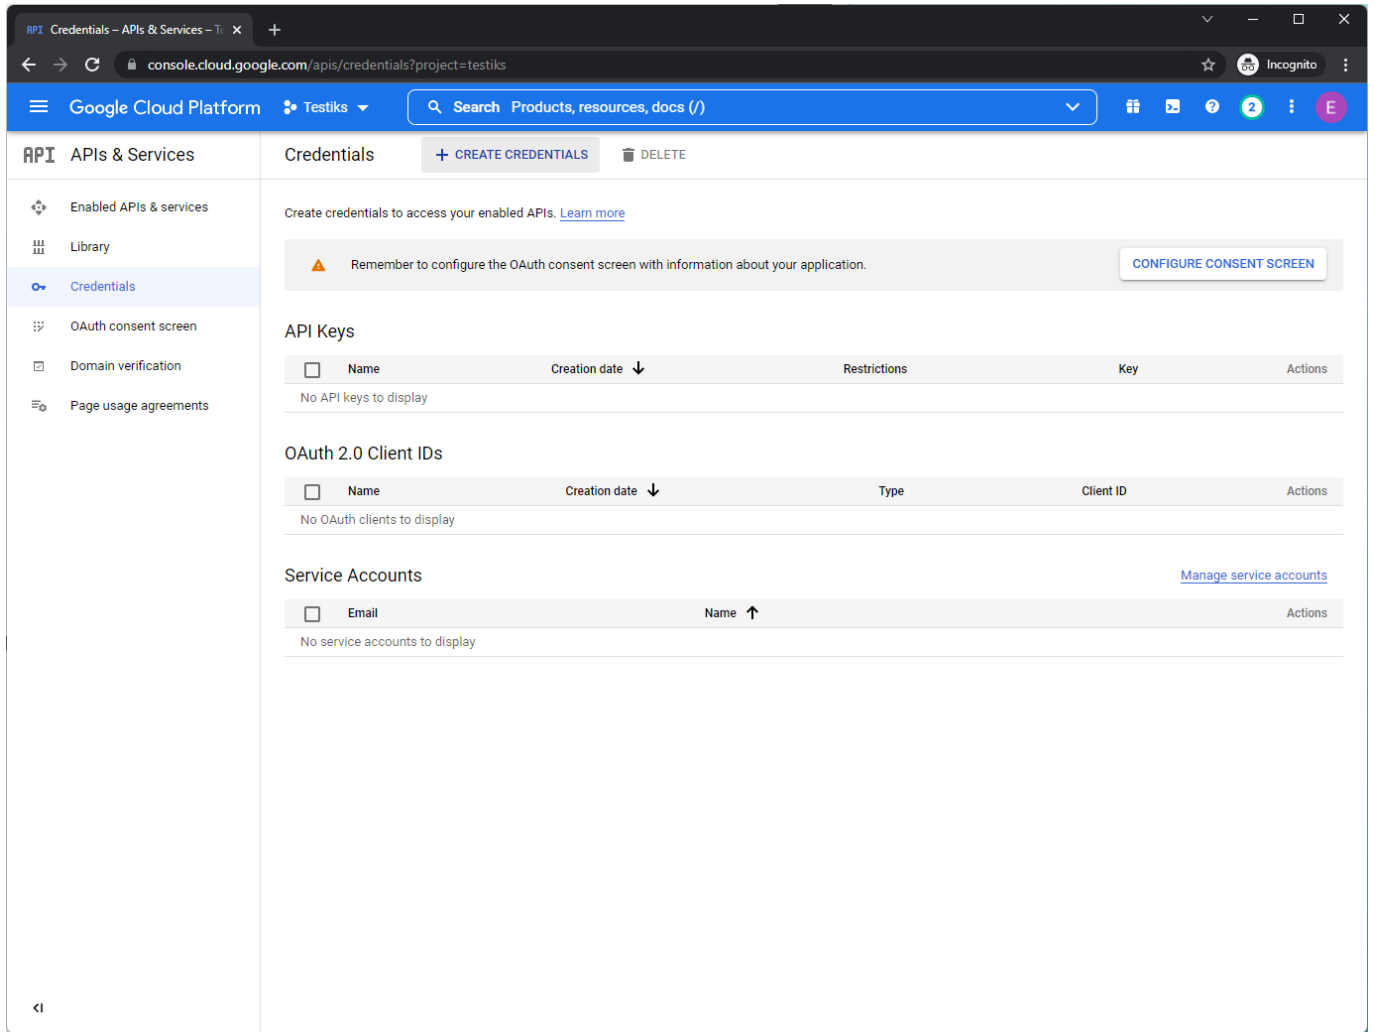

2. Järgmisel lehel vajutage nupule „Enable“.

3. Järgmisena avage vasakul üleval nurgas olev navigatsiooni menüü ja valige sealt „API's & Services → Credentials“.

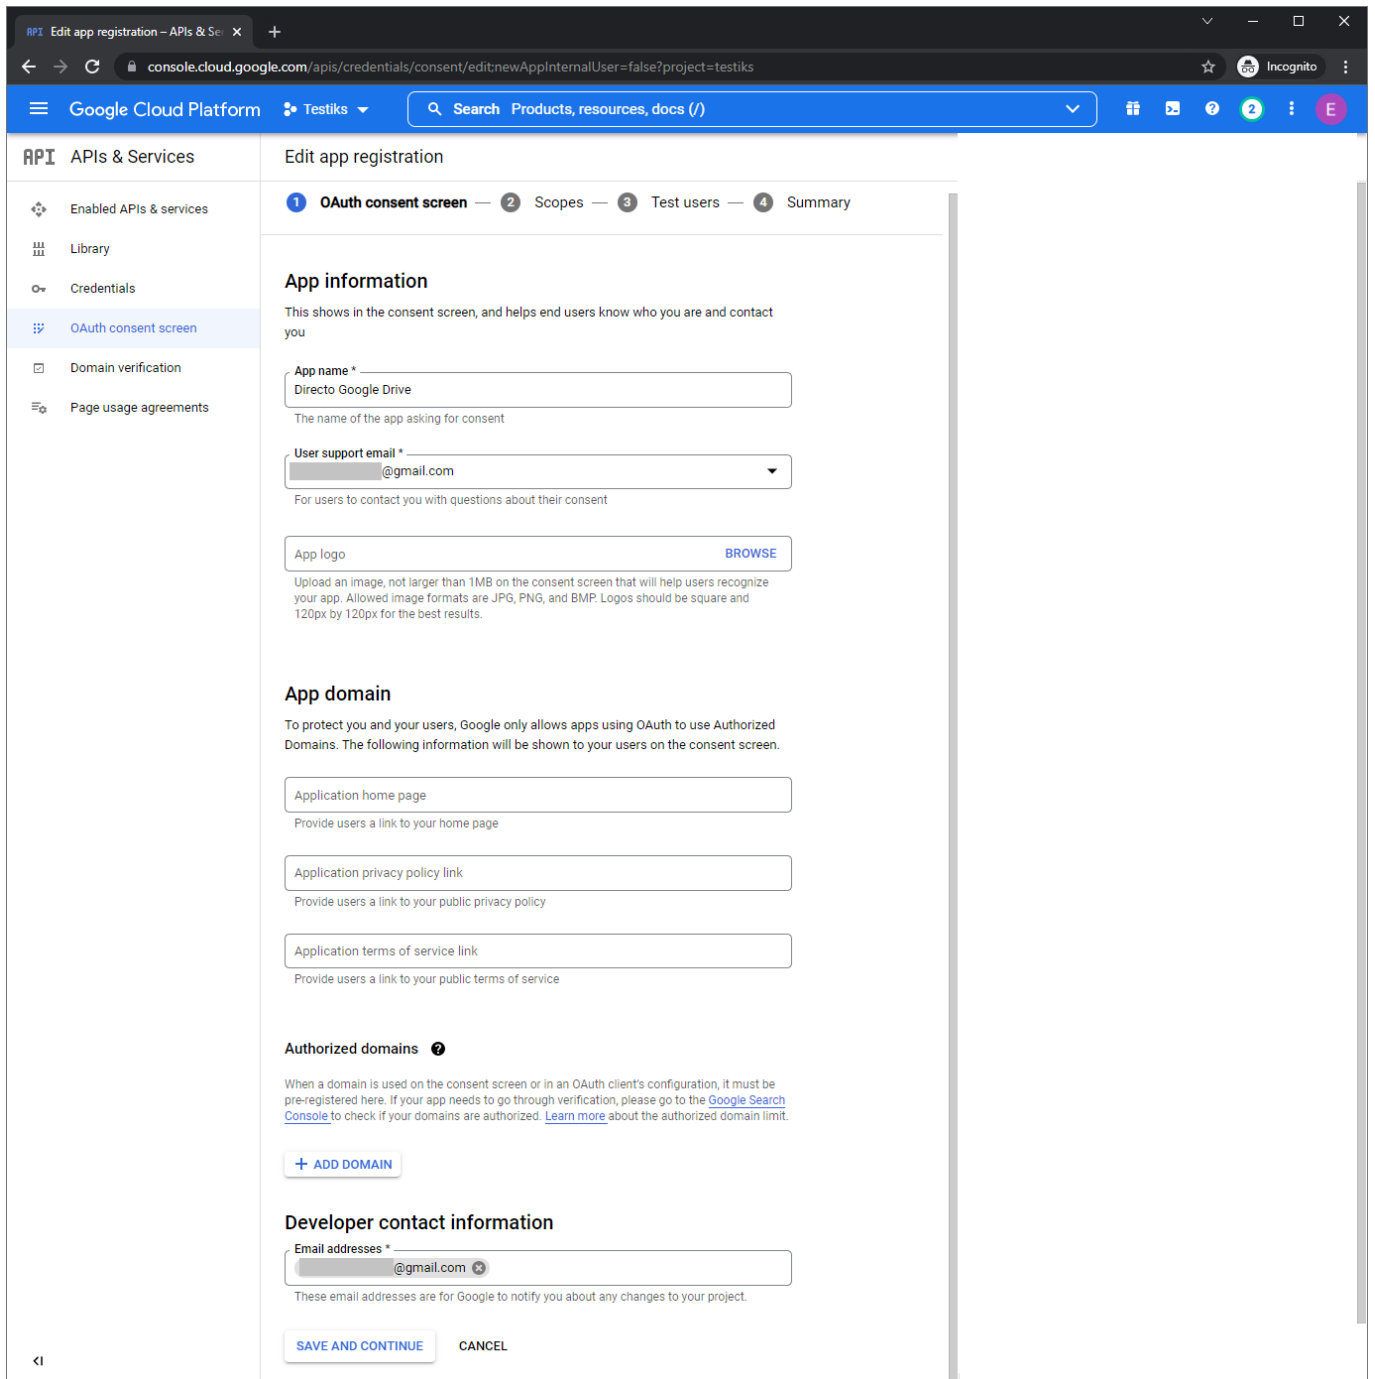

4. Vajutage nupule „Configure Consent screen“.

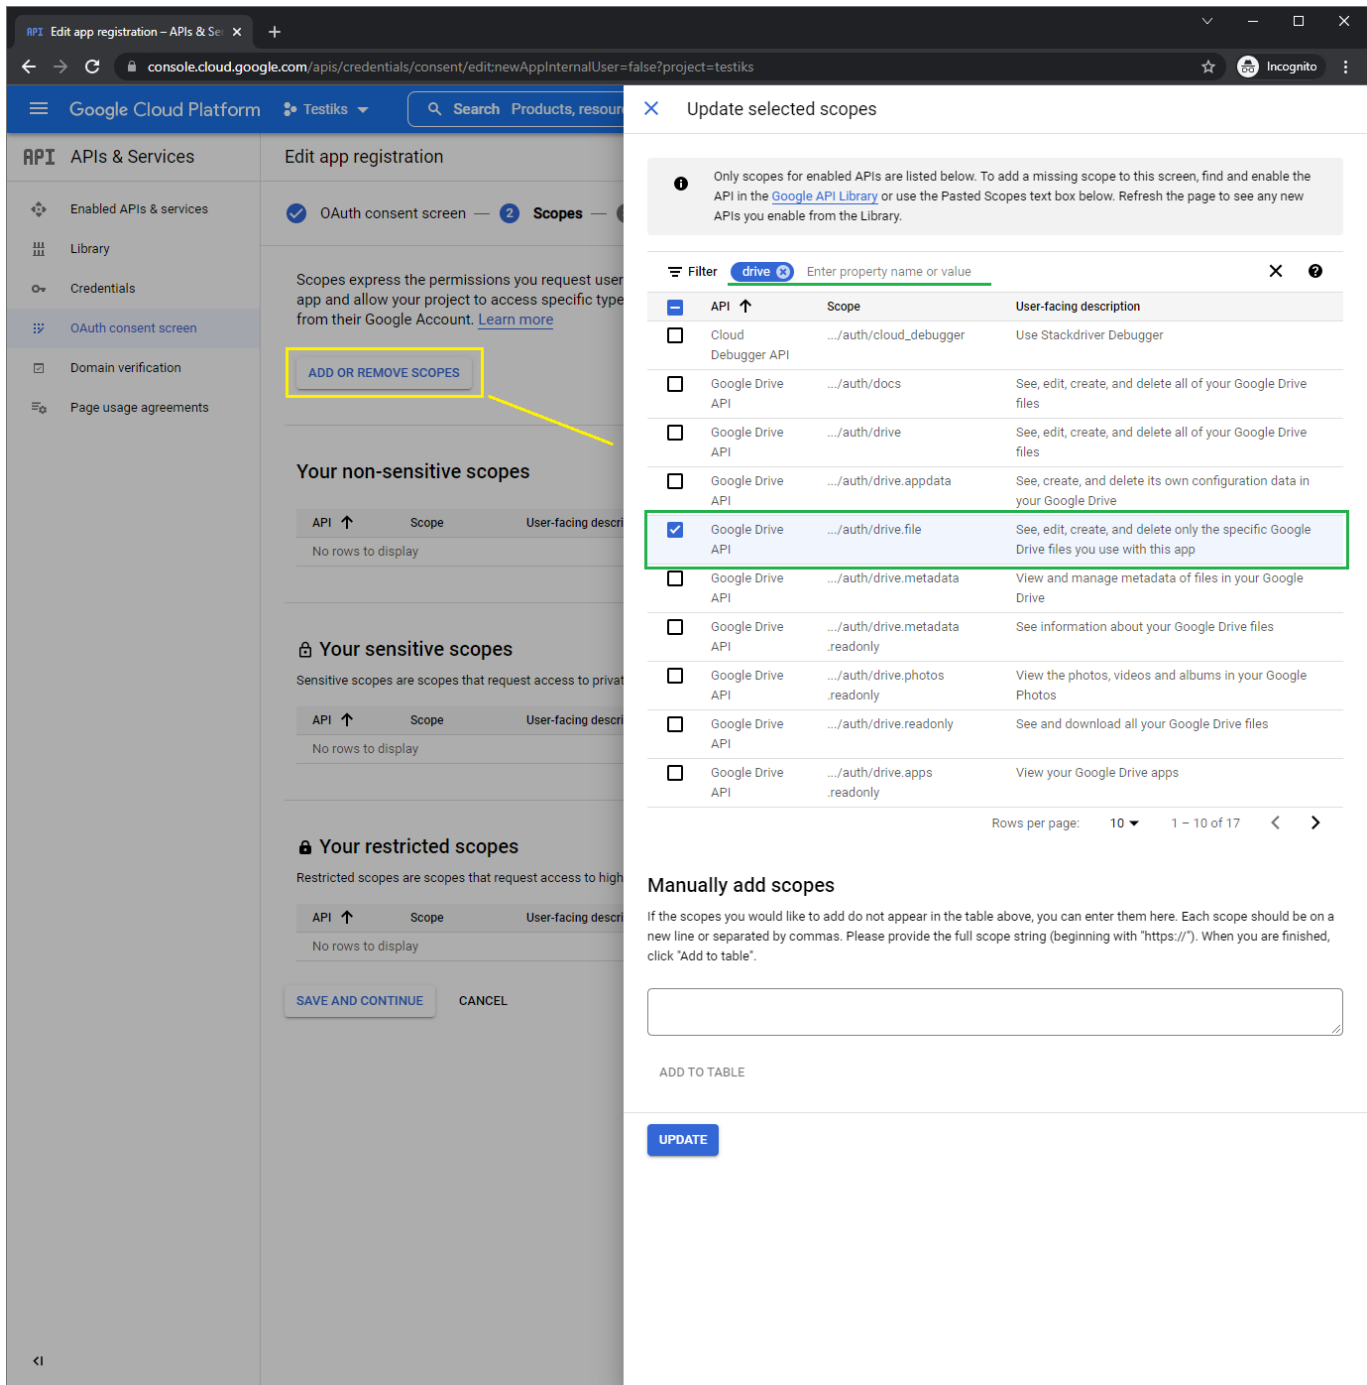

5. Täitke ees olev vorm nagu pildil näidatud ja vajutage nupule „Create“.

The screenshot shows the Google Cloud Platform console interface. The main content area is titled "OAuth consent screen" and contains the following text: "Choose how you want to configure and register your app, including your target users. You can only associate one app with your project." Below this is the "User Type" section, which has two radio button options: "Internal" (unselected) and "External" (selected). The "External" option has a tooltip that reads: "Available to any test user with a Google Account. Your app will start in testing mode and will only be available to users you add to the list of test users. Once your app is ready to push to production, you may need to verify your app. [Learn more about user type](#)". A blue "CREATE" button is located below the "External" option. At the bottom of the main content area, there is a link: "Let us know what you think about our OAuth experience". On the right side of the console, there is a "Learn" section with a list of frequently asked questions, each with a downward arrow icon: "Google OAuth consent screen", "What is the OAuth consent screen?", "What are OAuth consent scopes?", "What are sensitive API scopes?", "What are restricted API scopes?", "The app registration process", "What information do I need?", "Will my app need to be verified by Google?", "What if I don't verify my app?", "How long does the verification process take?", "How many users can use my app?", "Domain verification", and "What else should I review?".

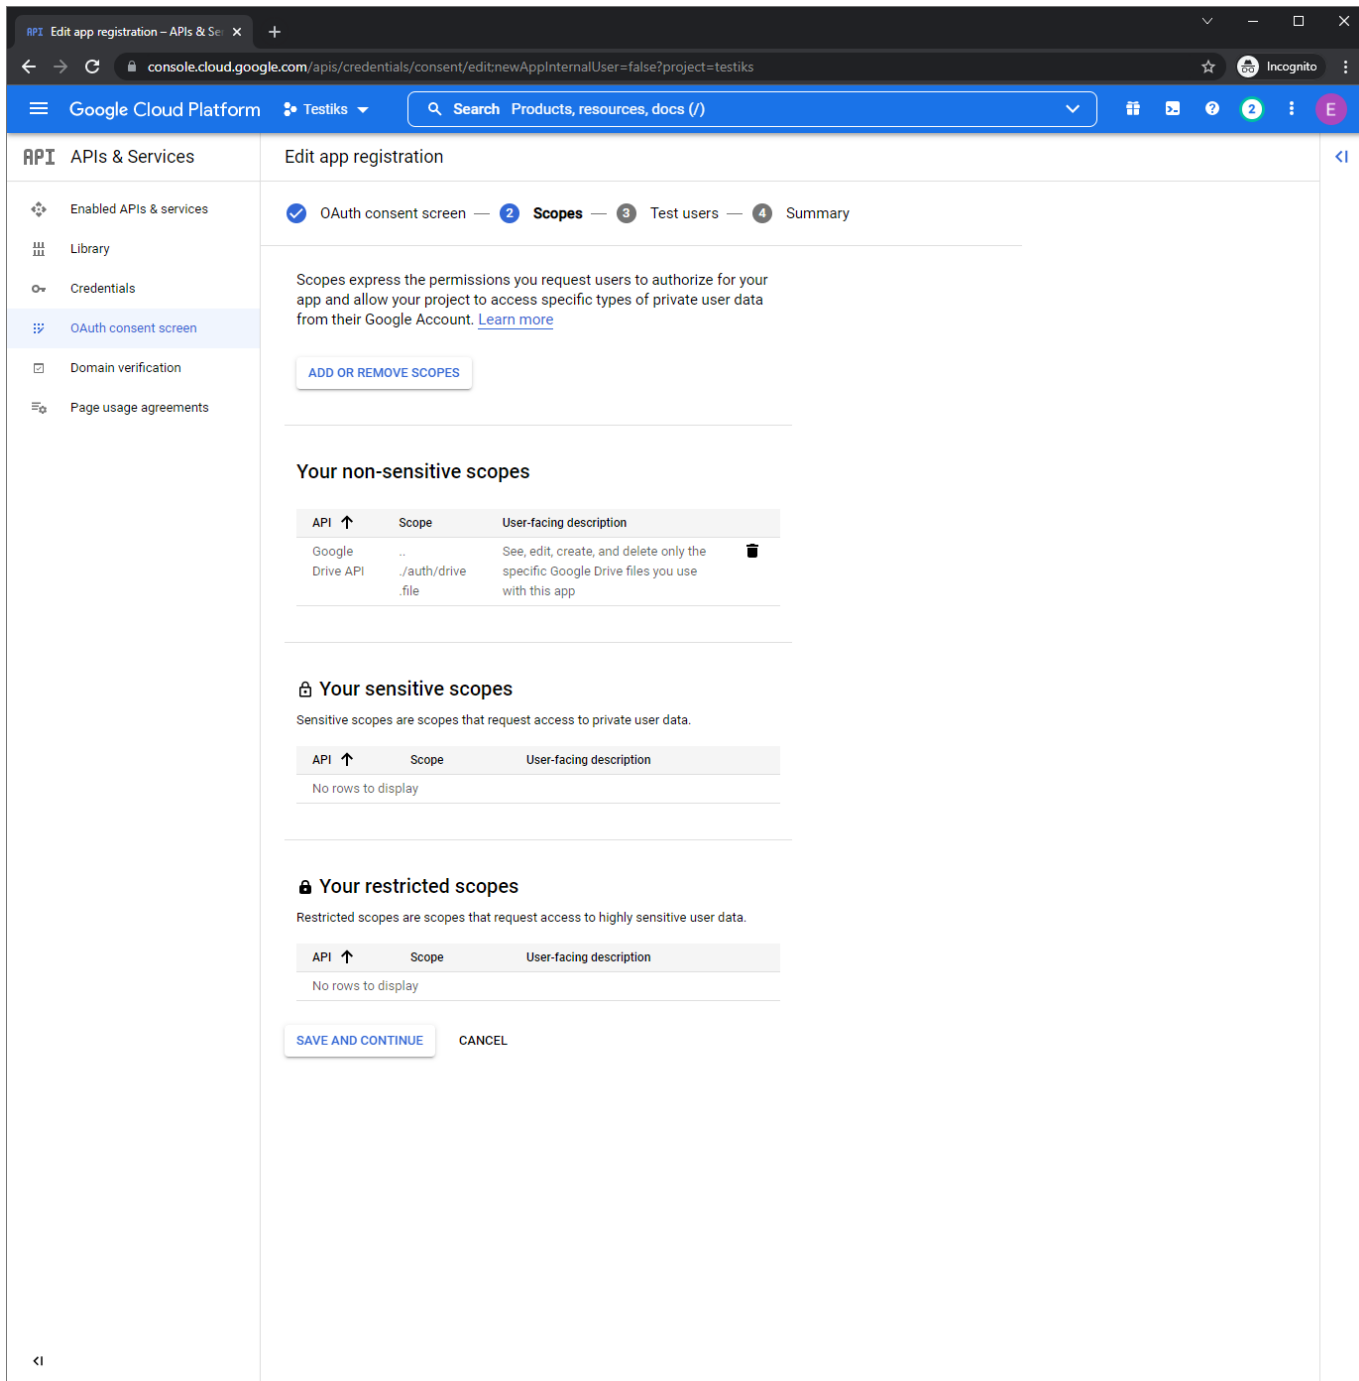

6. Täitke väljad kasutades oma enda kontrolli all olevat emaili ja vajutage all olevate „Save and Continue“ nuppu.

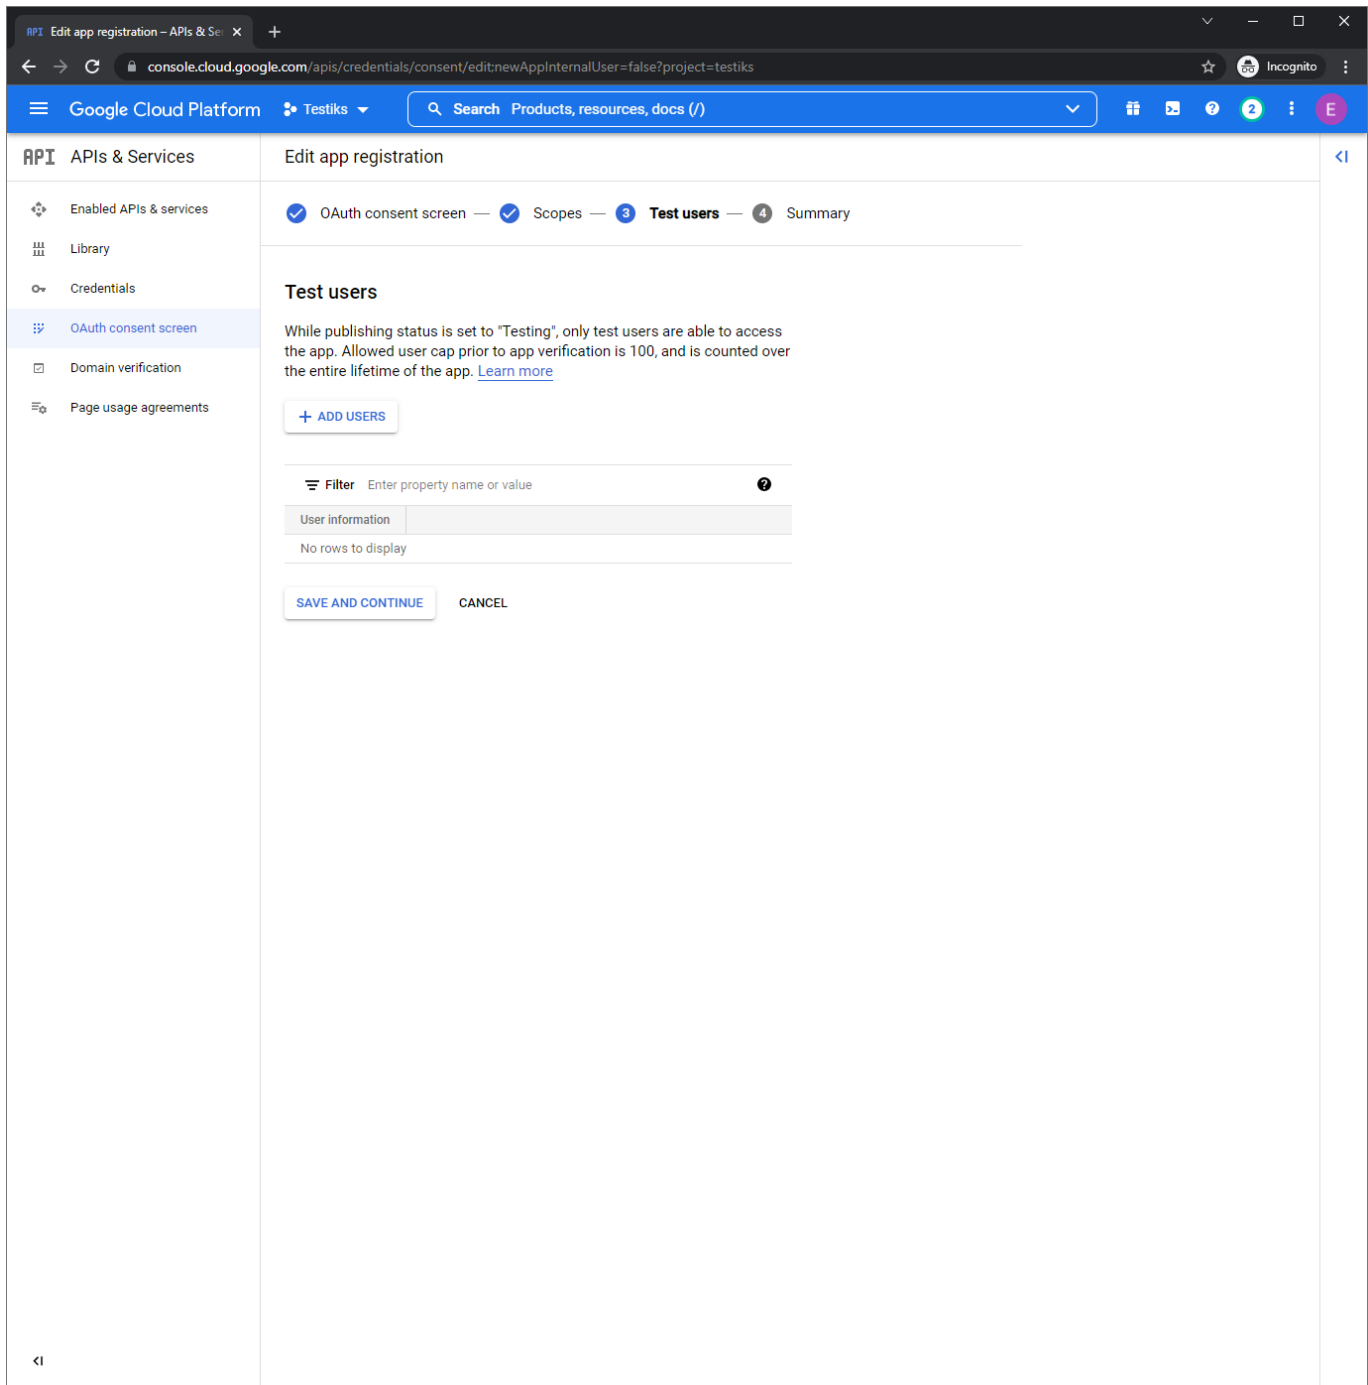

7. Vajutage nupule „Add or remove scopes“. Avanenud vaates olevasse „Filter“ välja kirjutage „drive“ ja markeerige otsinguvastete hulgast pildil näidatud valik.

Kui muudatud on tehtud vajutage „Update“.

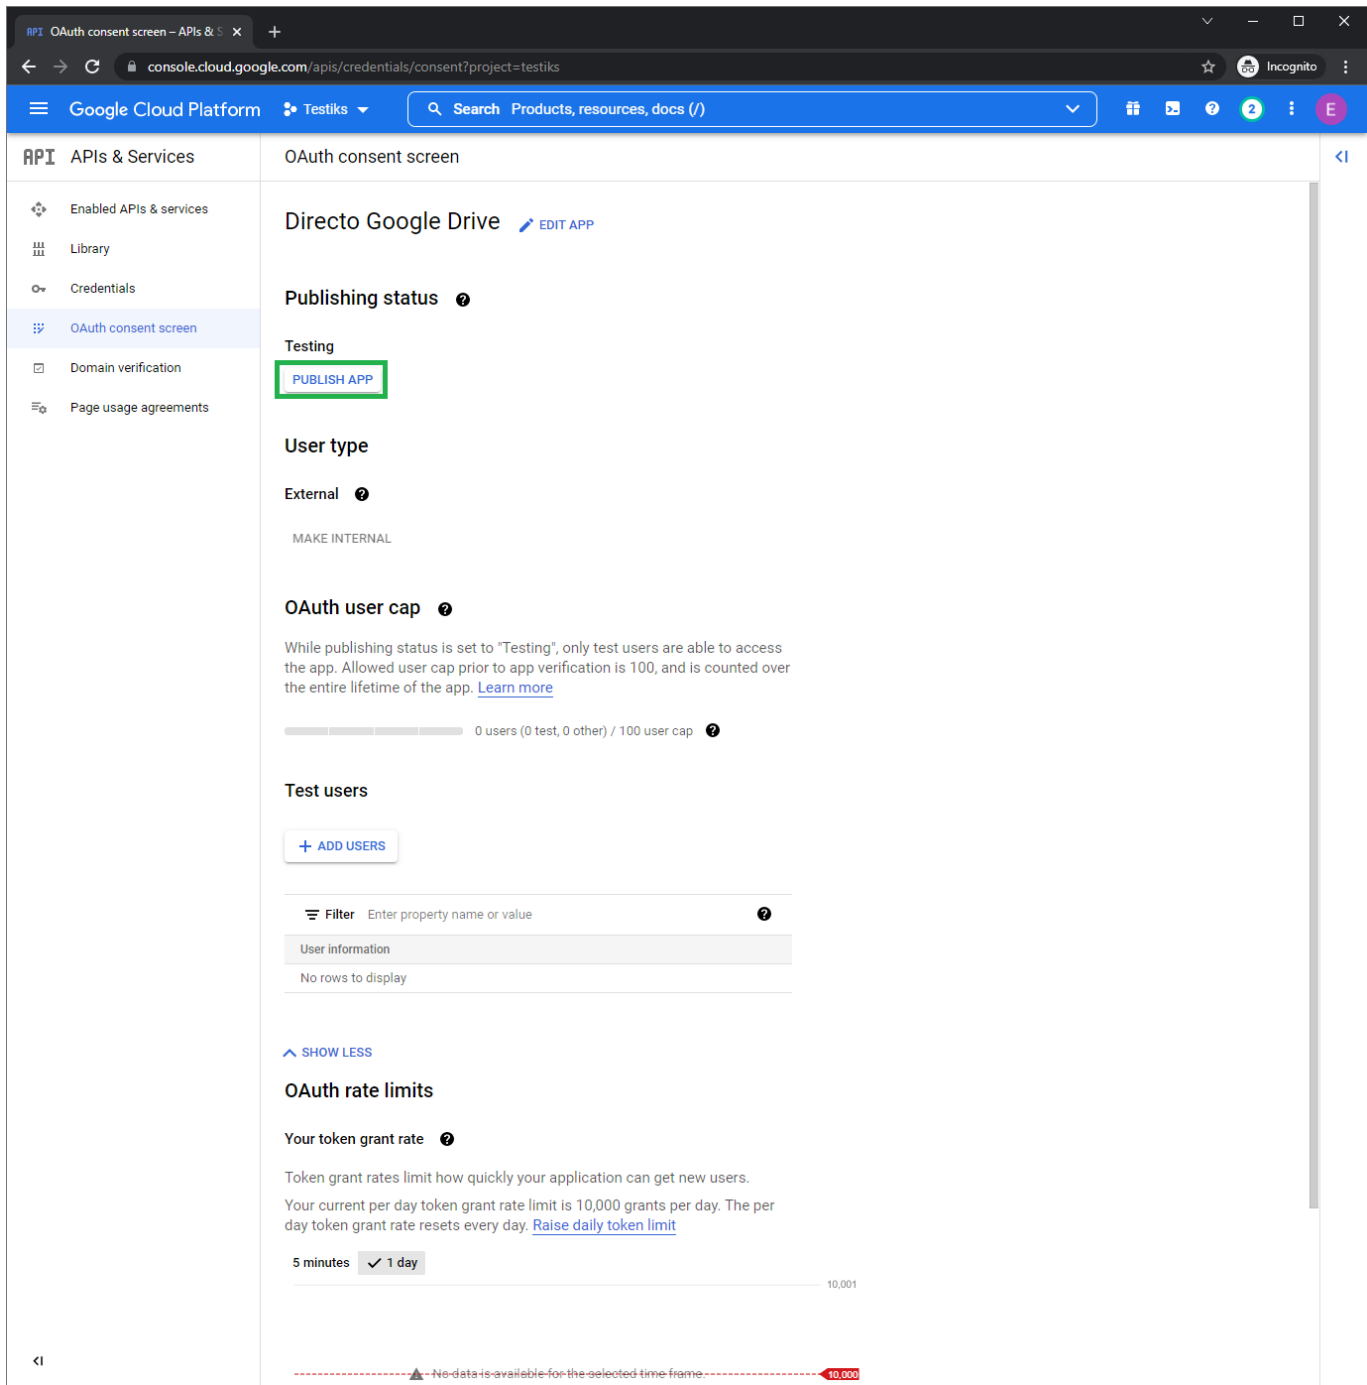

8. Järgmise lehe võib vahele jätta vajutades „Save and Continue“.

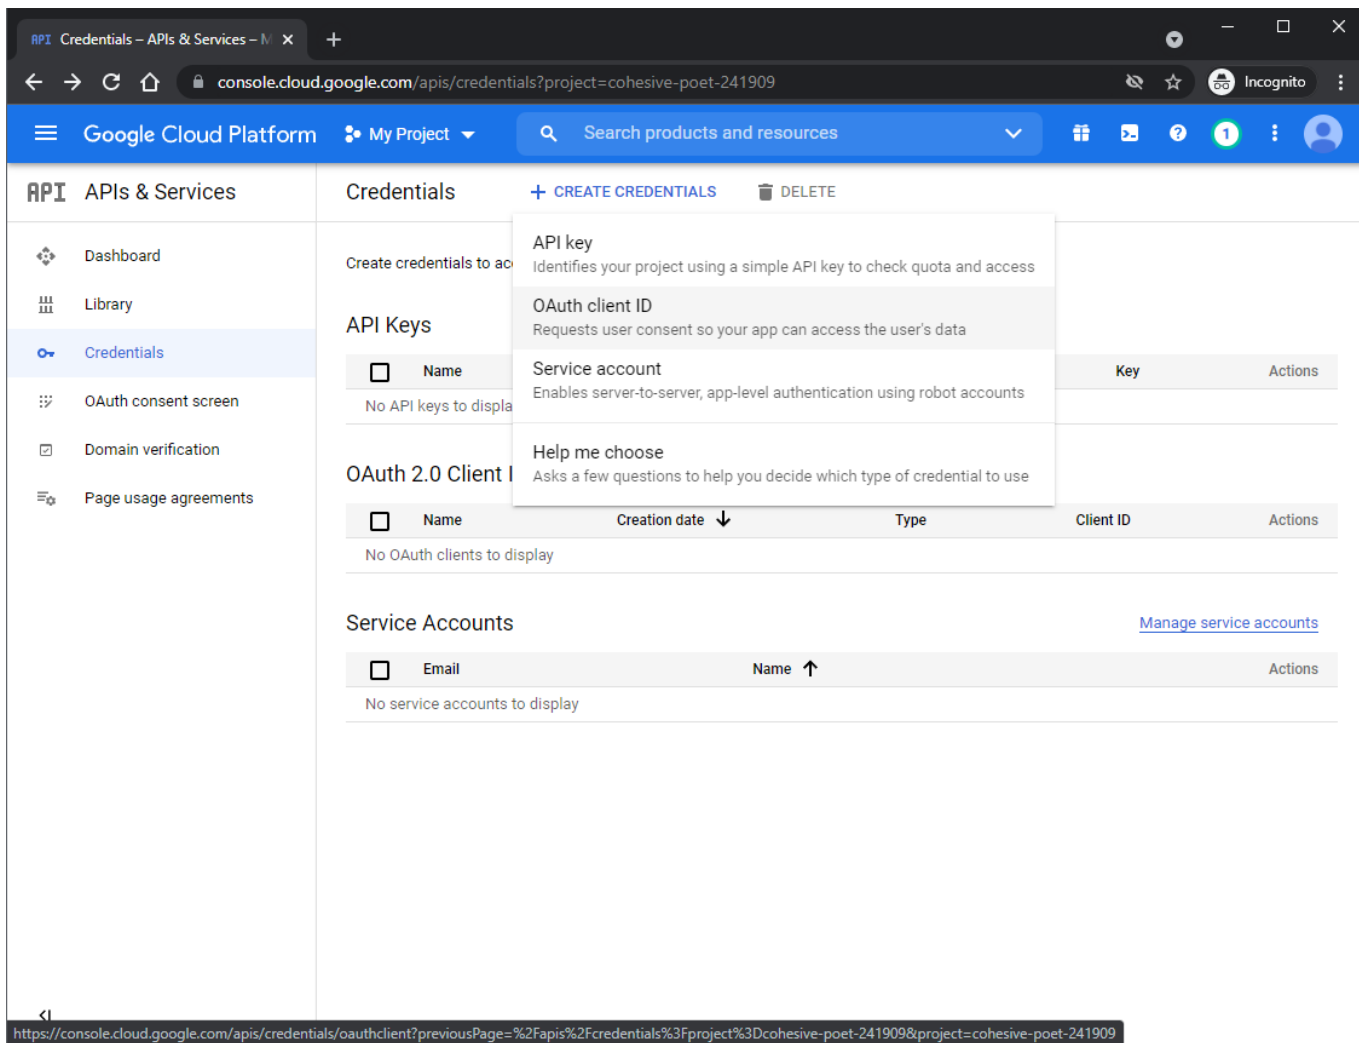

9. Sellel lehel näidatakse Teile ülevaadet. Vajutage nupule „Back to dashboard“.

The screenshot shows the Google Cloud Platform console interface for editing an OAuth consent screen. The left sidebar contains navigation options: Enabled APIs & services, Library, Credentials, OAuth consent screen (selected), Domain verification, and Page usage agreements. The main content area is titled 'Edit app registration' and includes an 'EDIT' link. The 'OAuth consent screen' section shows the following details: User type: External; App name: Directo Google Drive; Support email: [redacted]@gmail.com; App logo: Not provided; Application homepage link: Not provided; Application privacy policy link: Not provided; Application terms of service link: Not provided; Authorized domains: Not provided; Contact email addresses: [redacted]@gmail.com. Below this is the 'Scopes' section with an 'EDIT' link, containing a table with one row: Google Drive API, scope: .../auth/drive.file, and user-facing description: See, edit, create, and delete only the specific Google Drive files you use with this app. The 'Test users' section shows 0 users (0 test, 0 other) / 100 user cap and a filter input field. A 'BACK TO DASHBOARD' button is located at the bottom left of the main content area.

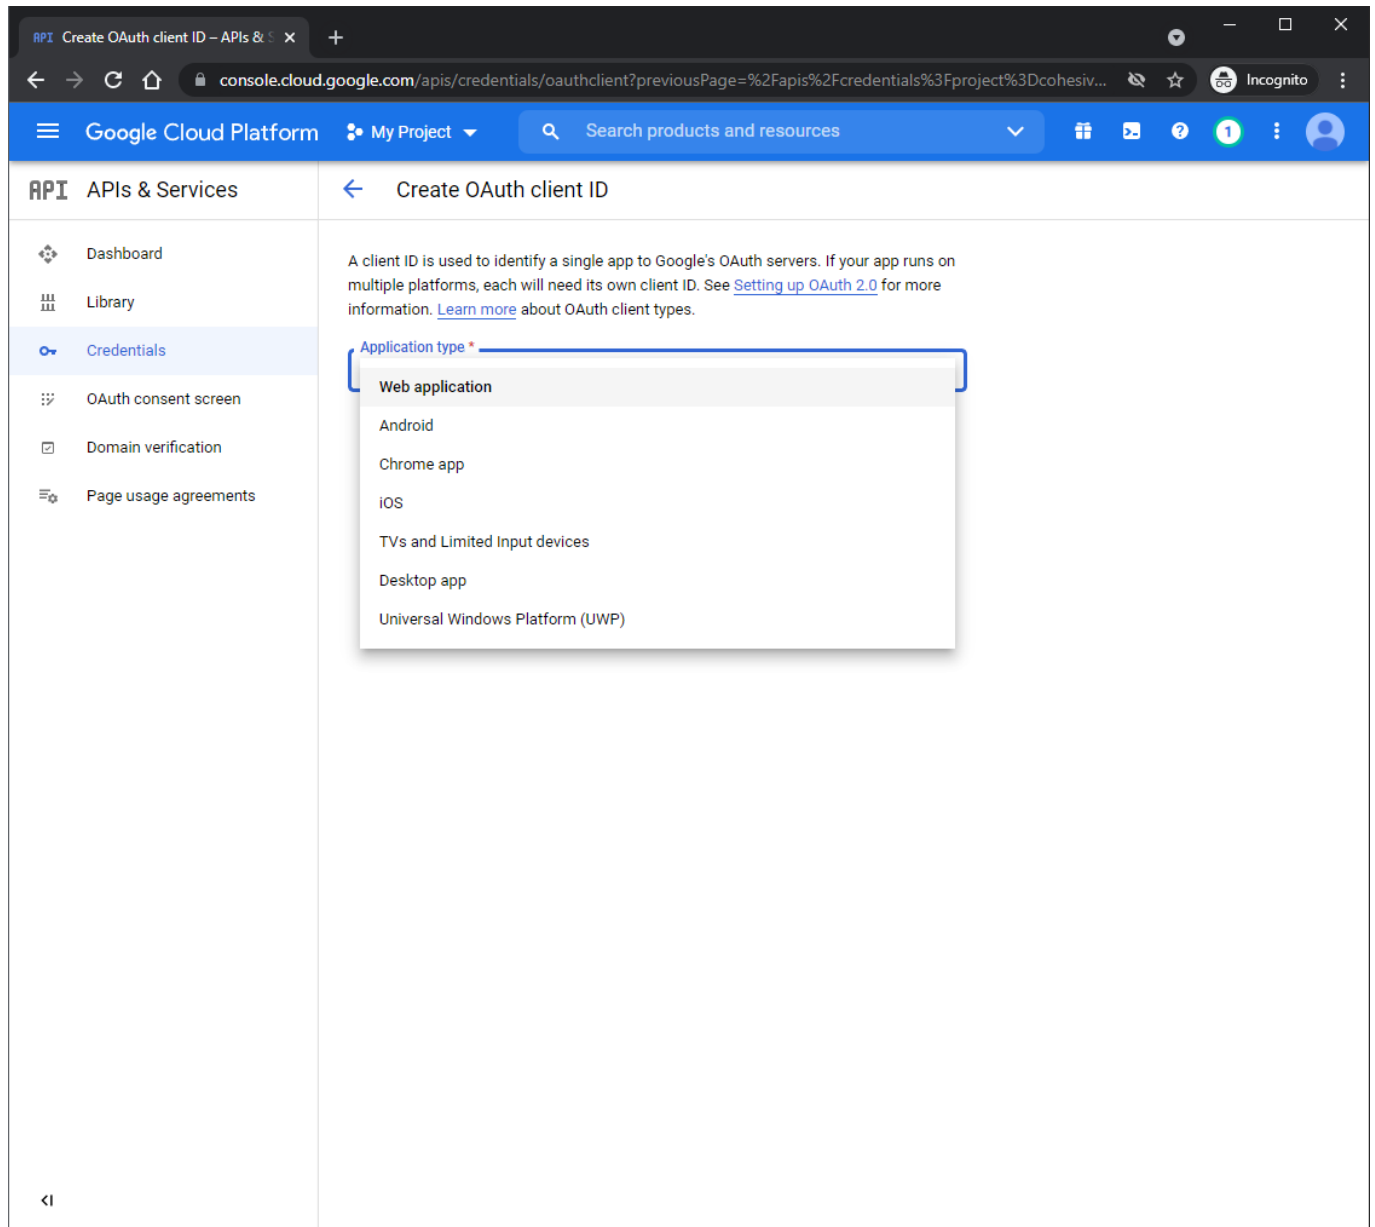

10. Aplikatsiooni avalikustamiseks vajutage nupule „Publish app“.

==== Google rakenduse võtmete loomine ==== Järgmisena on vaja luua võtmed mida Directo hakkab kasutama Teie Google rakendusega suhtlemiseks. Selleks navigeerige vasakul üleval ääres oleva menüü kaudu uuesti „API's & services → Credentials“. 1. Vajutage päises olevale nupule „Create credentials → OAuth Client ID“.

2. Valige rippmenüüst „Web Application“.

The screenshot shows the Google Cloud Platform console interface. The browser address bar displays the URL: `console.cloud.google.com/apis/credentials/oauthclient?previousPage=%2Fapis%2Fcredentials%3Fproject%3Dcohesiv...`. The page title is "Create OAuth client ID".

On the left side, there is a navigation menu with the following items:

- Dashboard
- Library
- Credentials (highlighted)
- OAuth consent screen
- Domain verification
- Page usage agreements

The main content area contains the following text:

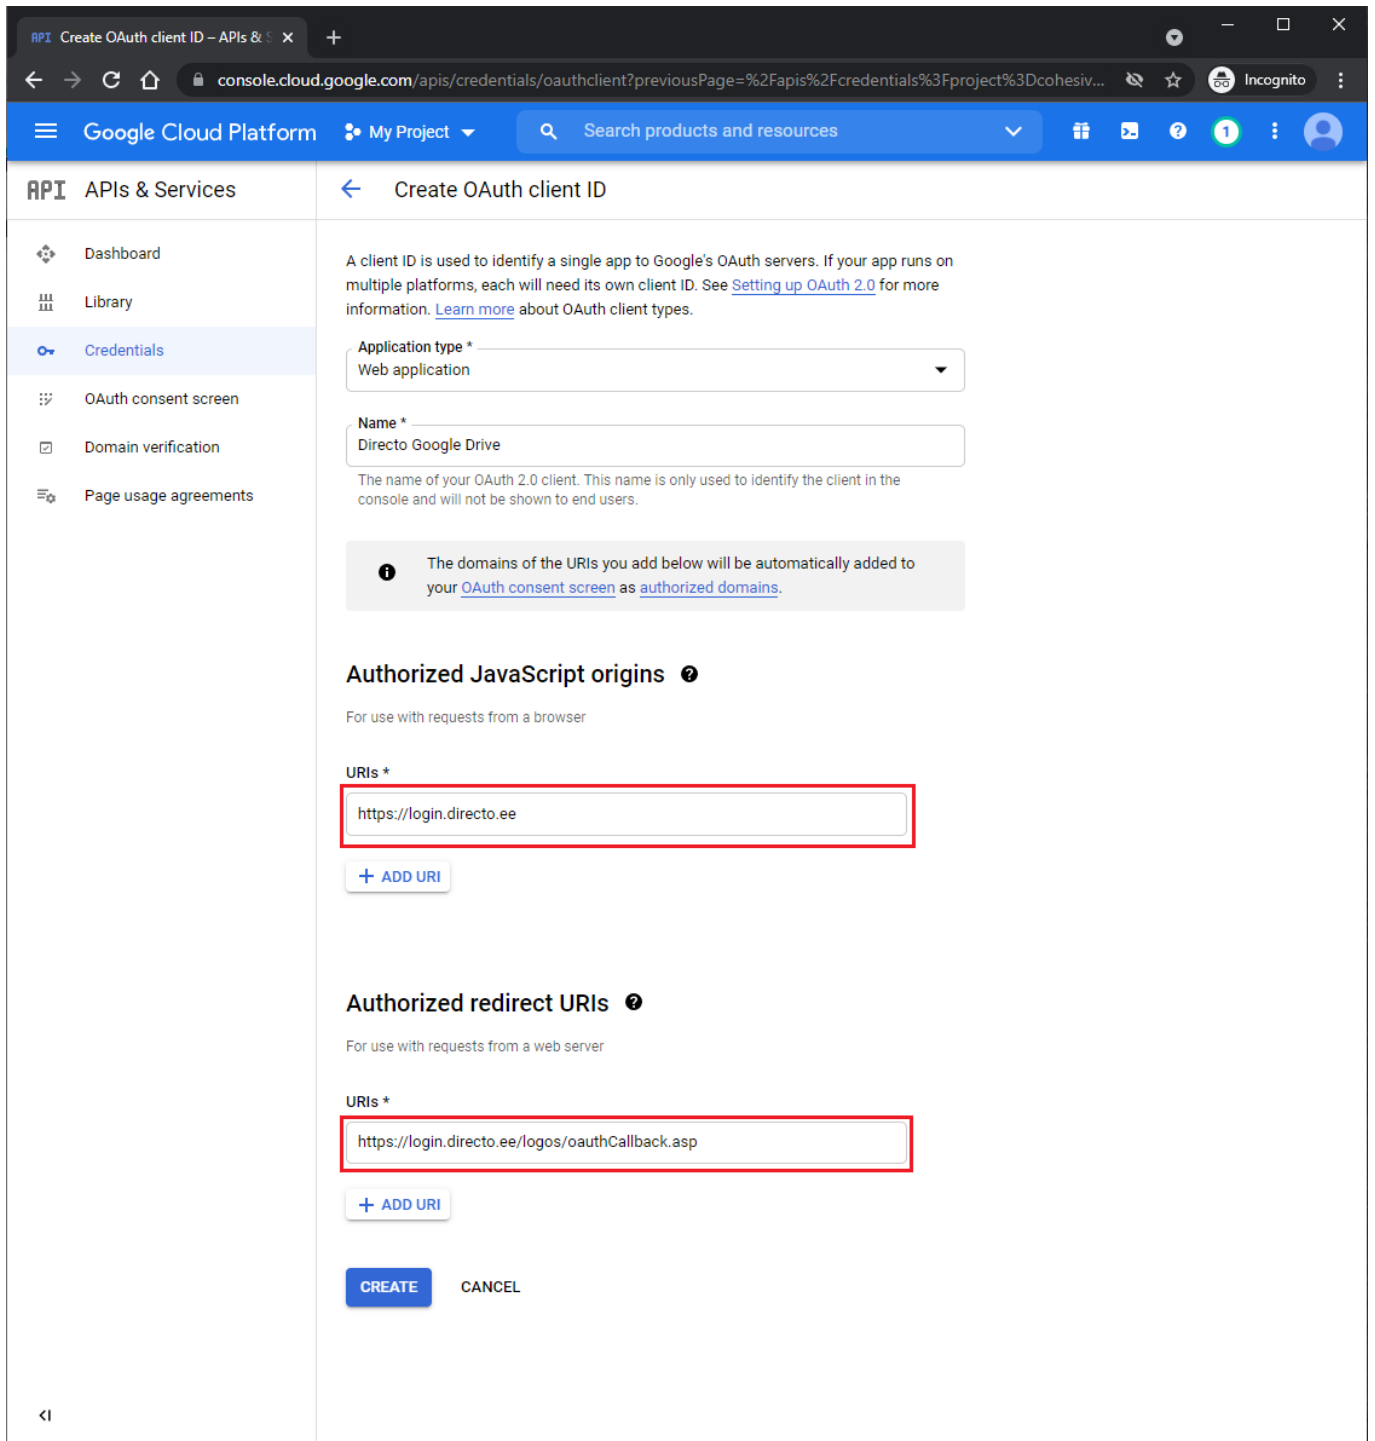

A client ID is used to identify a single app to Google's OAuth servers. If your app runs on multiple platforms, each will need its own client ID. See [Setting up OAuth 2.0](#) for more information. [Learn more](#) about OAuth client types.

The "Application type" dropdown menu is open, showing the following options:

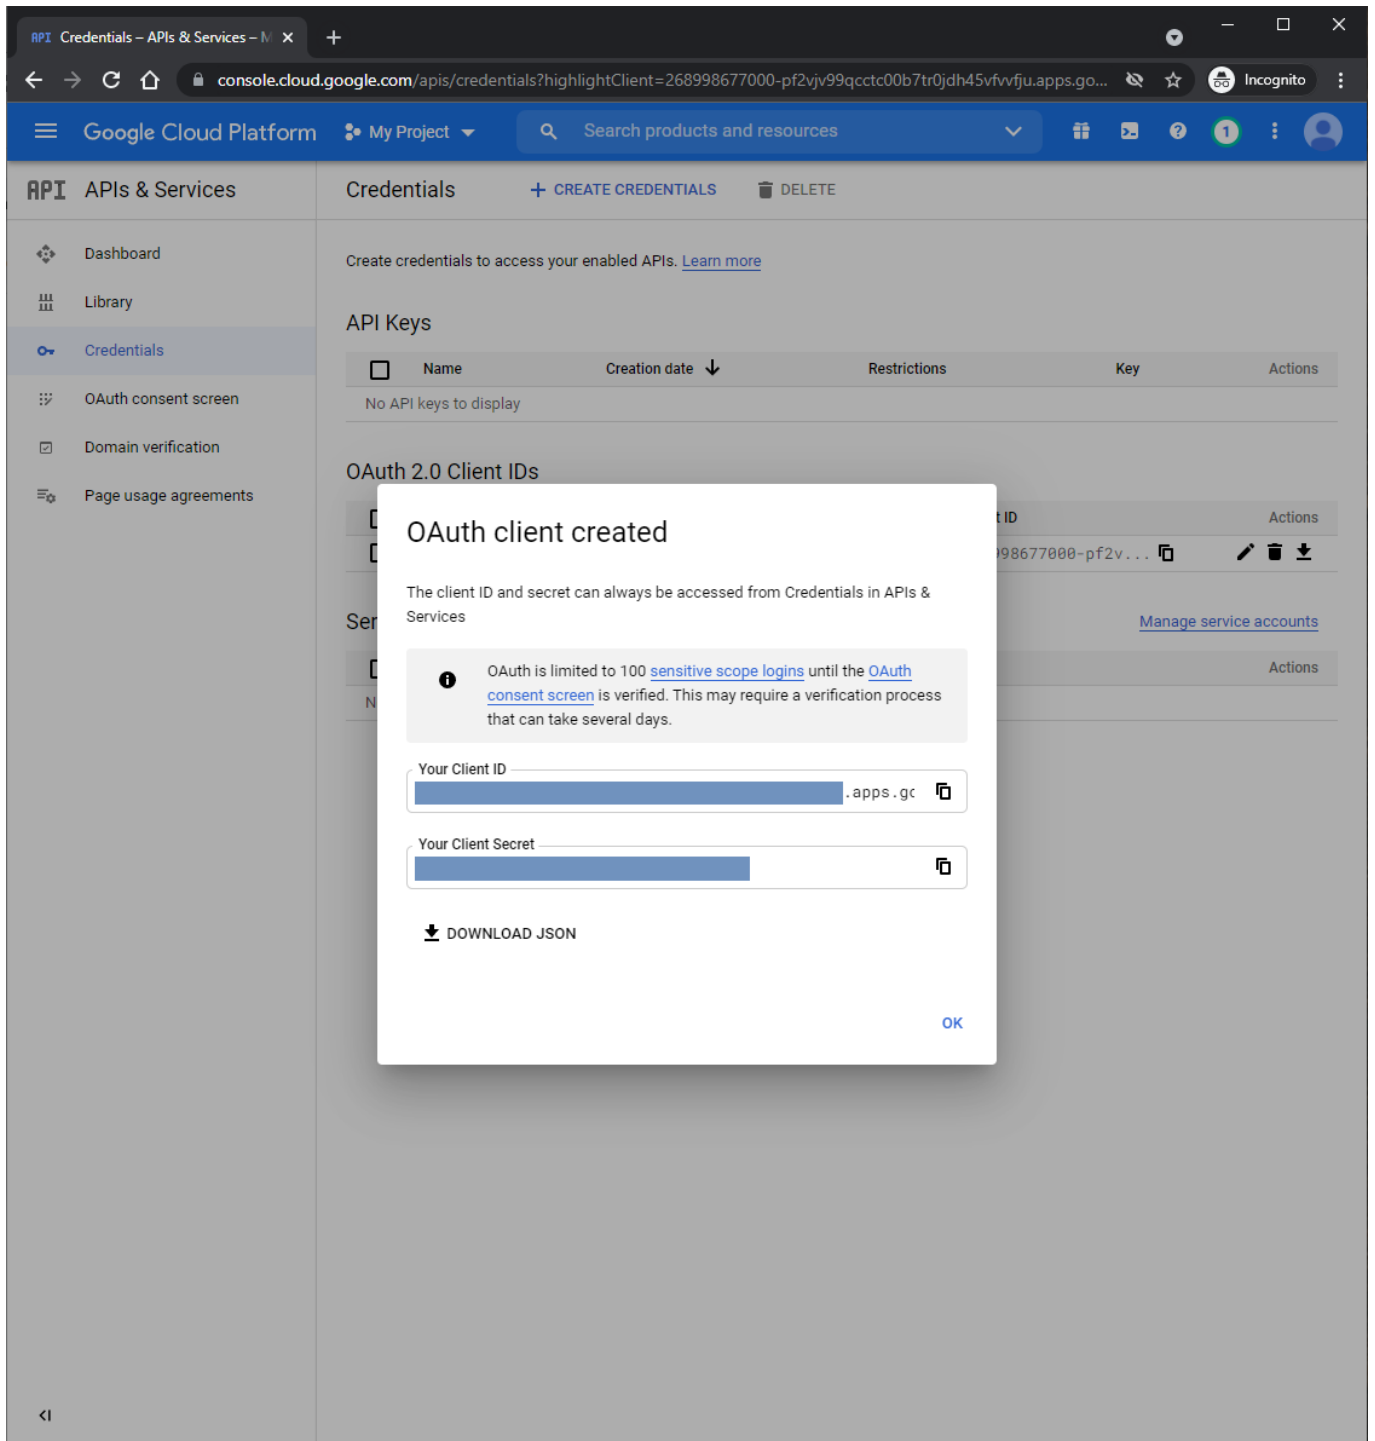

- Web application (highlighted)
- Android
- Chrome app
- iOS
- TVs and Limited Input devices
- Desktop app
- Universal Windows Platform (UWP)

A red box highlights the dropdown menu.

3. Järgmisena täitke pildil punaselt markeeritud väljad täpselt nii nagu näidatud ja vajutage nuppu „Create“.

4. Lõplik tulemus on „Client ID“ ja „Client Secret“ väärtused mis tuleb komaga eraldatuna lisada Directosse süsteemi seadistuse „Google drive client_id ja client_secret“ väärtuseks. Näiteks 124124.apps.googleusercontent.com, fqowjfoiqwhfoiqwf5g.

==== Google Drive'i sisse lülitamine Directos ==== Lõpetuseks tuleb Directos seadistuste alt minna „Manuste hoiustamine“ ja sealt vajutada valikule „Hoia dokumendi manuseid Google Drive's“. Peale vajutamist avaneb Google'i enda login aken kus tuleb ennast autentida kontoga mida soovite manuste hoiustamiseks kasutada. Peale autentimist aken sulgub ja edaspidi liiguvad kõik manustatud dokumendid otse Google Drive'i ja kõik olemasolevad manused tõstetakse taustal ümber.
