SSO SAML Login Configuration Guide (Google SAML and Entra ID)

SAML 2.0 Service Provider Endpoint for Directo

For connecting to Directo's SAML service, use the following endpoint:

Reply URL/ACS and Entity ID:

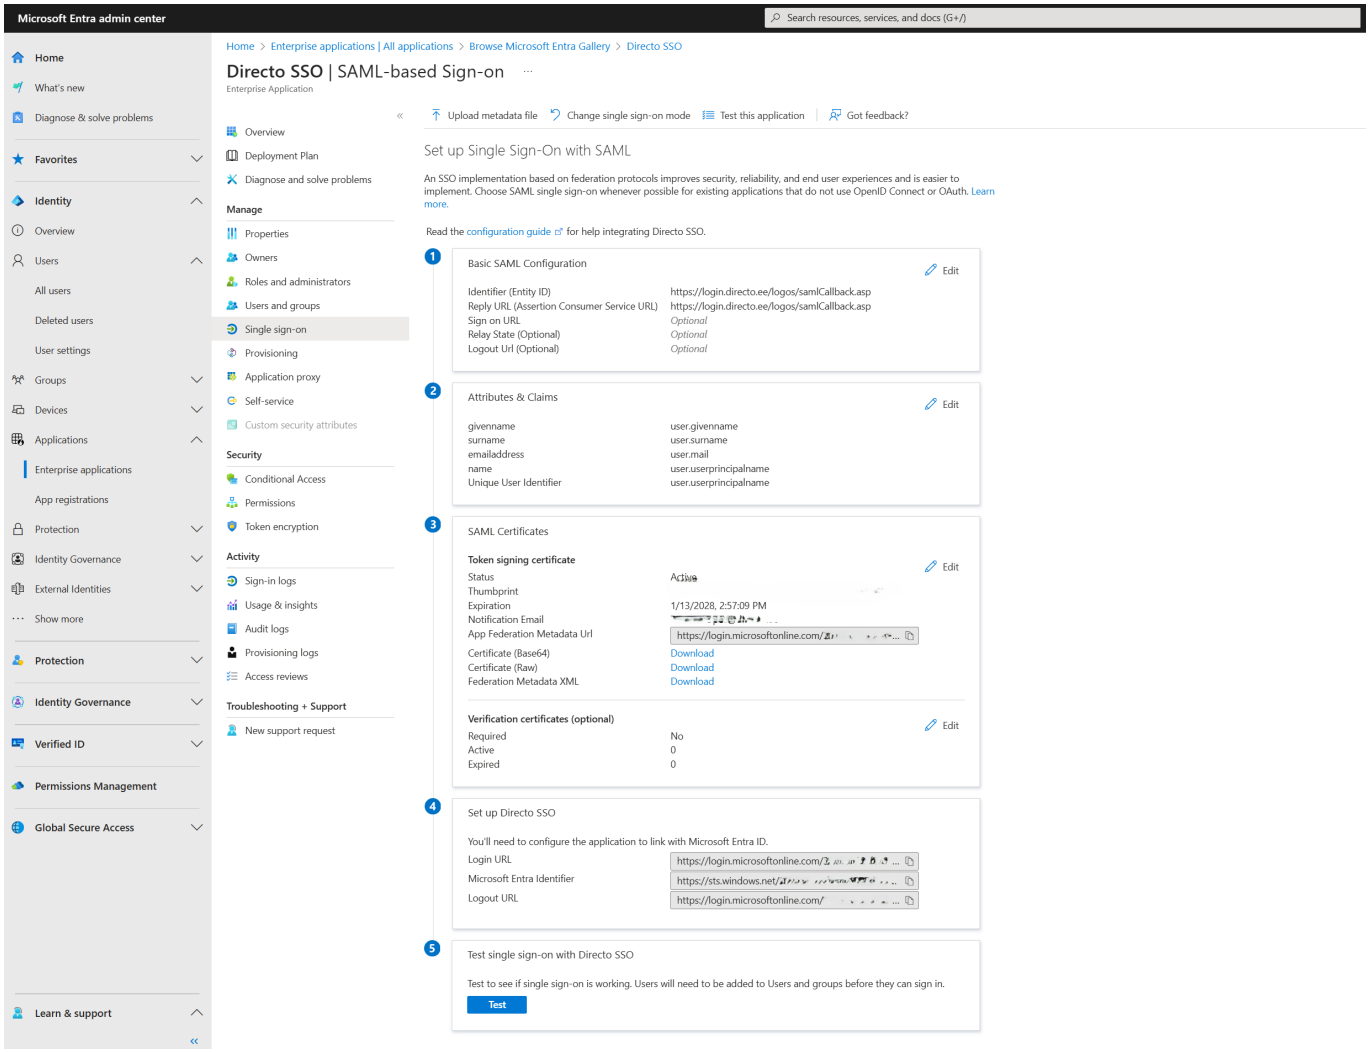
```
https://login.directo.ee/logos/samlCallback.asp
```

Entra ID Configuration

To set up SAML authentication with Entra ID:

1. Create a new application in Entra with SAML as the Single Sign-On method
2. Configure the application according to Entra's documentation
3. Use the Directo Reply URL/ACS and Entity ID values provided above

Once properly configured in Entra ID, your setup should look like this:



Configuring the Login Button in Directo

To set up the SAML login button:

1. Navigate to General Settings → SAML Login Settings in Directo
2. Configure the button with your desired name - this will appear on the Directo login page
3. Enter the required parameters from your SAML service provider environment

Important Configuration Notes

SAML Attribute Mapping

This field determines how Directo identifies users. You can choose to match users by Email address, or Username.

 Tip: The system setting „Only configured SSO methods can be used to log in“ allows you to:

- Disable traditional username/password login
- Disable ID card authentication
- Make SSO the exclusive login method for your organization
