SSO SAML nustatymo vadovas (Google SAML ir Microsoft Entra ID)

SAML 2.0 paslaugų teikėjo (Service Provider) galinis taškas Directo sistemai

Norint prisijungti prie Directo SAML paslaugos, naudokite šį galinį tašką (endpoint):

Reply URL/ACS ir Entity ID:

```
https://login.directo.ee/logos/samlCallback.asp
```

Entra ID Configuration

To set up SAML authentication with Entra ID:

1. Create a new application in Entra with SAML as the Single Sign-On method
2. Configure the application according to Entra's documentation
3. Use the Directo Reply URL/ACS and Entity ID values provided above

Once properly configured in Entra ID, your setup should look like this:

The screenshot shows the Microsoft Entra admin center interface. The left-hand navigation pane includes sections for Home, What's new, Diagnose & solve problems, Favorites, Identity, Overview, Users, Groups, Devices, Applications, Enterprise applications, App registrations, Protection, Identity Governance, External Identities, Verified ID, Permissions Management, and Global Secure Access. The main content area is titled 'Directo SSO | SAML-based Sign-on' and contains a 'Set up Single Sign-On with SAML' configuration page. This page is divided into five numbered sections: 1. Basic SAML Configuration (with fields for Identifier, Reply URL, Sign on URL, Relay State, and Logout URL); 2. Attributes & Claims (with fields for givenname, surname, emailaddress, name, and Unique User Identifier); 3. SAML Certificates (with a table for Token signing certificates and Verification certificates); 4. Set up Directo SSO (with fields for Login URL, Microsoft Entra Identifier, and Logout URL); and 5. Test single sign-on with Directo SSO (with a 'Test' button).

Configuring the Login Button in Directo

To set up the SAML login button:

1. Navigate to General Settings → SAML Login Settings in Directo
2. Configure the button with your desired name - this will appear on the Directo login page
3. Enter the required parameters from your SAML service provider environment

Important Configuration Notes

SAML Attribute Mapping

This field determines how Directo identifies users. You can choose to match users by Email address, or Username.

□ Tip: The system setting „Only configured SSO methods can be used to log in“ allows you to:

- Disable traditional username/password login
- Disable ID card authentication
- Make SSO the exclusive login method for your organization
