# SSO SAML nustatymo vadovas (Google SAML ir Microsoft Entra ID)

## SAML 2.0 paslaugų teikėjo (Service Provider) galinis taškas Directo sistemai

Norint prisijungti prie Directo SAML paslaugos, naudokite šį galinį tašką (endpoint):

**Reply URL/ACS ir Entity ID:**

```
https://login.directo.ee/logos/samlCallback.asp
```

## Entra ID Nustatymas

**Norint sukonfigūruoti SAML autentifikaciją su Entra ID:**

- Sukurkite naują programą Entra sistemoje, kaip „Single Sign-On“ metodą pasirinkdami SAML.
- Suformuokite programos konfigūraciją pagal Entra dokumentacijoje pateiktas instrukcijas.
- Naudokite aukščiau pateiktas Directo **Reply URL/ACS** ir **Entity ID** reikšmes.

Kai konfigūracija Entra ID bus atlikta teisingai, jūsų nustatymai turėtų atrodyti taip:

The screenshot shows the Microsoft Entra admin center interface. The left-hand navigation pane includes sections like Home, What's new, Diagnose & solve problems, Favorites, Identity, Overview, Users, Groups, Devices, Applications, Enterprise applications, App registrations, Protection, Identity Governance, External Identities, Verified ID, Permissions Management, and Global Secure Access. The main content area is titled 'Directo SSO | SAML-based Sign-on' and contains a 'Set up Single Sign-On with SAML' configuration page. This page is divided into five numbered sections: 1. Basic SAML Configuration (with fields for Identifier, Reply URL, Sign on URL, Relay State, and Logout URL); 2. Attributes & Claims (with fields for givenname, surname, emailaddress, name, and Unique User Identifier); 3. SAML Certificates (with a 'Token signing certificate' section showing status, expiration, and download links, and a 'Verification certificates (optional)' section); 4. Set up Directo SSO (with fields for Login URL, Microsoft Entra Identifier, and Logout URL); 5. Test single sign-on with Directo SSO (with a 'Test' button).

## Configuring the Login Button in Directo

To set up the SAML login button:

1. Navigate to General Settings → SAML Login Settings in Directo
2. Configure the button with your desired name - this will appear on the Directo login page
3. Enter the required parameters from your SAML service provider environment

## Important Configuration Notes

### SAML Attribute Mapping

This field determines how Directo identifies users. You can choose to match users by Email address, or Username.

The screenshot shows the 'Directo seadistused' (Directo settings) interface. On the left is a navigation menu with options like 'Süsteemi seadistused', 'Üldised seadistused', 'AAL retseptid', 'Dokumentide väljad', 'Hankija klassid', 'Kasutajad', 'Kasutajagrupid', 'Kausta mallid', 'Keeled', 'Kinnitamise eeldus / Menetlus', 'Kohad', and 'Kohustuslikud väljad'. The main area is titled 'SSO SAML login seadistused' (SSO SAML login settings). It includes a breadcrumb 'Üldised seadistused > SSO SAML login seadistused'. The 'Nupu pealkiri' (Button title) is set to 'Google SAML'. Under 'SSO konfiguratsioon' (SSO configuration), the 'Login URL' is 'https://accounts.google.com/o/saml2/idp?idpid=xxx' and the 'Logout URL' is empty. The 'SAML atribuutide kaardistus' (SAML attribute mapping) is set to 'Email'. At the bottom are buttons for 'Tagasi' (Back), 'Salvesta' (Save), and 'Kustuta' (Delete).

The screenshot shows the Directo login page titled 'Vali sisenemisviis' (Choose login method). There are four tabs: 'Kasutajanimi' (Username), 'ID-Kaart' (ID Card), 'Mobiil-ID' (Mobile ID), and 'Smart-ID'. The 'Kasutajanimi' tab is selected. Below the tabs are input fields for 'Kasutajanimi' (Username) and 'Parool' (Password). There are two large blue buttons: 'Sisene' (Log in) and 'Google SAML'. At the bottom left is a checkbox 'Näita parooli' (Show password) and at the bottom right is a link 'Unustasid parooli?' (Forgot password?).

□ Tip: The system setting „Only configured SSO methods can be used to log in“ allows you to:

- Disable traditional username/password login
- Disable ID card authentication
- Make SSO the exclusive login method for your organization
