2.2. Errors

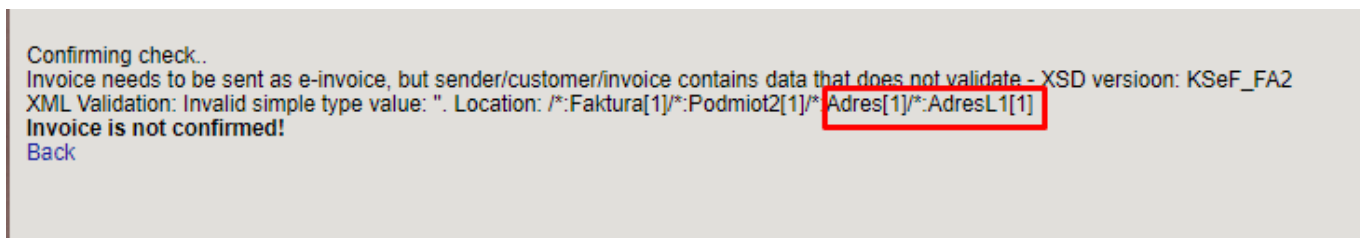

While confirming of the invoice, Directo checks if the settings are filled correctly. If there is something incorrect - there is no possibility to confirm the invoice with checkbox **e-sending**. You may confirm invoice with out the checkbox **e-sending** - it will not be send to KSEF.

For example, in the picture we see error message.

The error is in field AdresL1

In wiki part **3. Sales invoices tags** you have to find AdresL1 field and check the setting according to the description:

Name	Description
Podmiot1	Information about the seller
Adres/AdresL1	Setting→Master Settings→Company legal address
Podmiot2	Information about the buyer
Adres/AdresL1	Customer fields: Street, City, Postal code

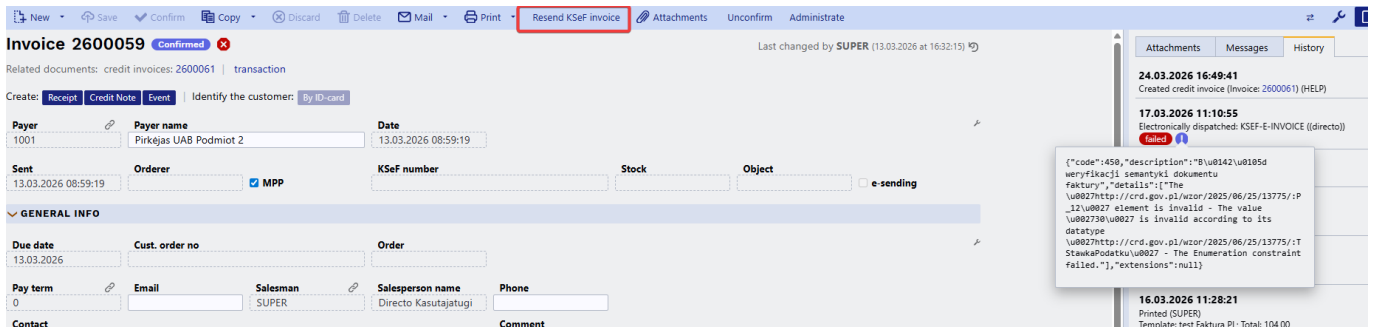

If you are using datafield for invoice No. - some errors may be seen in document after confirmation:

Resending

After confirmation, if there will be some issues while sending invoice to KSEF you can read error messages, fix the errors and resend the invoice by using the button in sales invoice document

Resend KSeF invoice
